SOGEDIS

ELECTROMENAGER

SERIES A

TOOLS FOR DISASSEMBLE

Phillips screwdriver

- *All kinds of star-head screws,
- *in the phillips screw of the internal components,

Plier

- *It is used to bend all kinds of sheet metal ends.

Multimeter

- *Resistance values of all kinds of internal components,
- *Electronic card resistors,
- *It is used to measure the resistance of display cards.

Flat Screwdriver

It is used to remove all kinds of aesthetic parts (side panels, front panels and external aesthetic parts of the machine).

SideCutter

It is used to cut cables of internal components or any hard part.

Chargeable Drill

It is the most important tool used to remove and install all kinds of screws in the machine.

1.3 A SERIES W/O DISPLAY(A11, A12,A13,A14, A15)

The user interface includes:

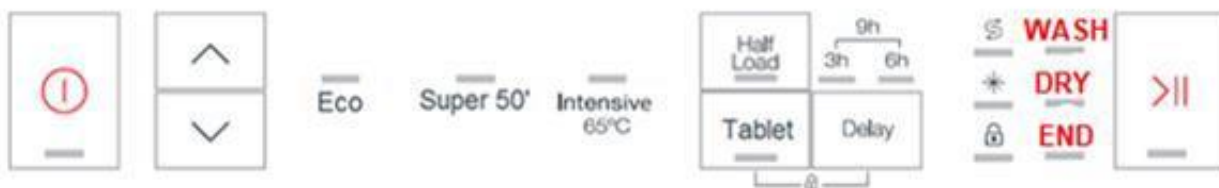

- On/Off button with integrated led
- Up/down button
- Program leds
- Half Load button with integrated led(Half Load led)
- Tablet button with integrated led (Tablet led)
- Delay button
- Delay durations with 2 leds

- Rinse aid and Salt leds
- Child lock led
- Program status with Wash, Dry and End leds
- Start/Stop and Reset button with integrated led

A11

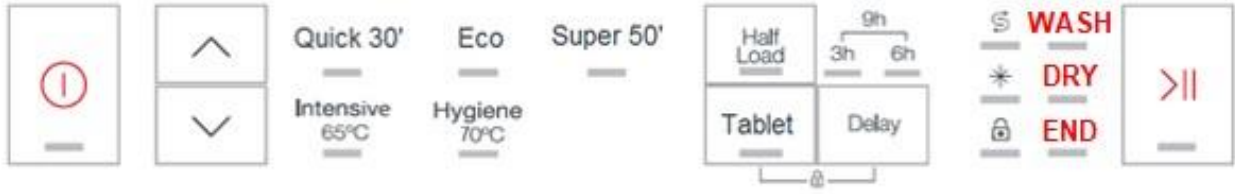

A12

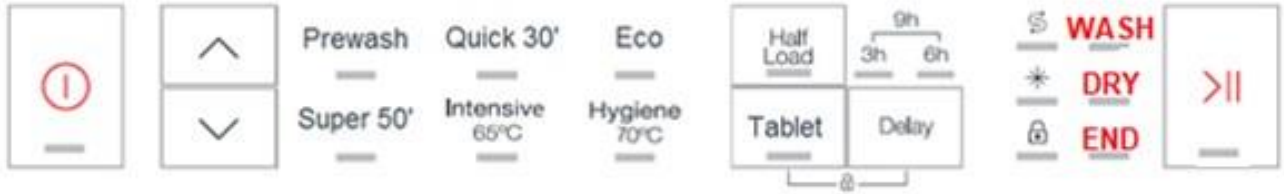

A13

A14

A15

1.4 A SERIES W DISPLAY-W/O DIVERTER(A1A, A1B,A1C,A1D,A1E)

The user interface includes:

- On/Off button with integrated led
- Program button
- Program leds
- Delay button
- Rinse aid and Salt leds
- 888 display with “delay timer active” icon
- Program status with Wash, Rinse, Dry and End leds
- Start/Stop and Reset button with integrated led
- Half Load button with integrated led(Half Load led)
- Tablet button with integrated led (Tablet led)

Not: Makineye power on yapıldığında kullanıcı moduna kadar geçen sürede tüm display all led on olarak gelir.

VERSION 0 ((Zambak_VxRx1 için)

Display versiyonu “Zambak” serisi olan modeller.

A1B

A1C

A1D

A1E

Note: At the beginning date of 09.10.2020, for all A1 digit and A2 models;

- In A1 digit and A2 models; When the program is stopped, in addition to the S/P led, the washing progress (wash-rinse-dry) led should also blink.
- A1 digit models; When HL or Tablet options are selected, the corresponding icon under 888 should light up in addition to the leds on its own button (as in the display software used for Carya-Erica).

VERSİYON 3: A1E_ELS

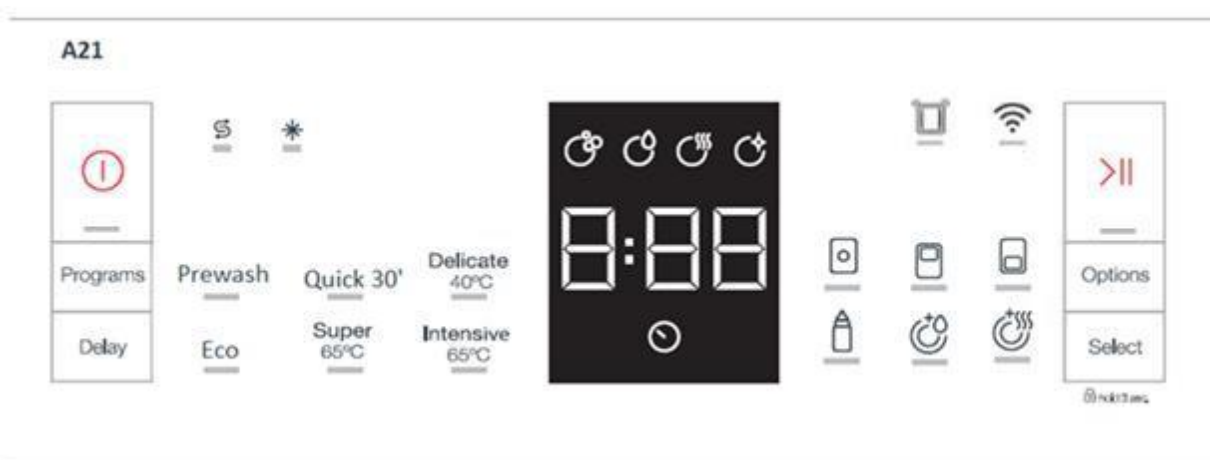

1.5 A SERIES W/ DIVERTER(A21,A22,A23,A24,A25,A26_ELS,A26,A27,A28,A29)

The user interface includes:

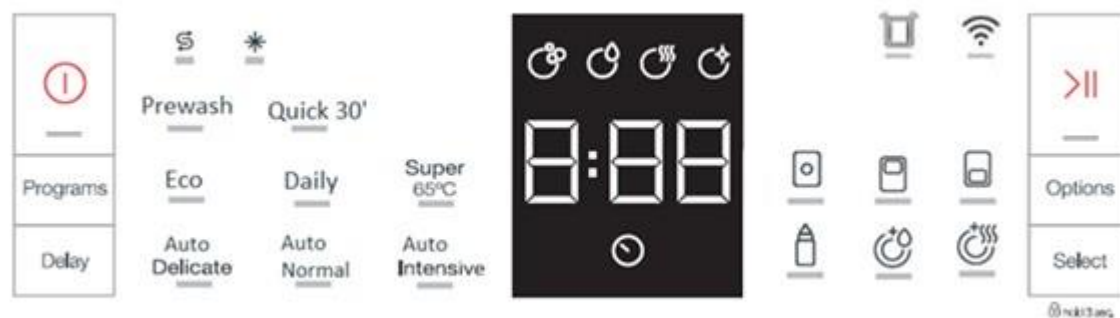

- On/Off button with integrated led
- Program button
- Program leds
- Delay button
- Rinse aid and Salt leds
- 888 display with “delay timer active” icon
- Program status with Wash, Rinse, Dry and End leds
- Start/Stop and Reset button with integrated led
- Half Load button with integrated led(Half Load led)
- Tablet button with integrated led (Tablet led)

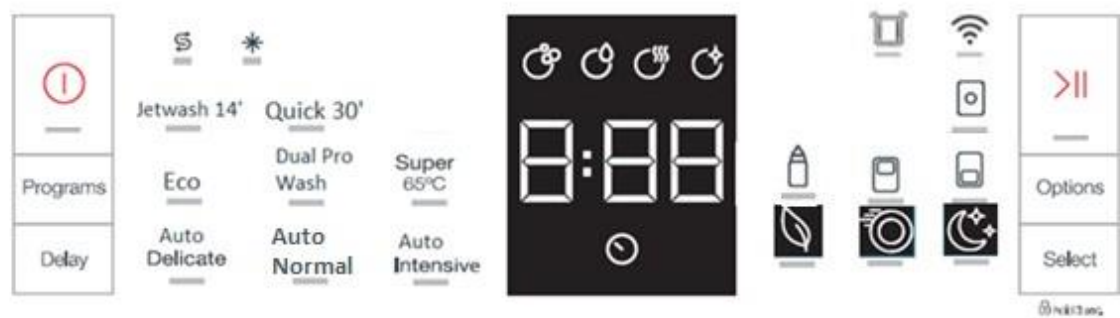

A22

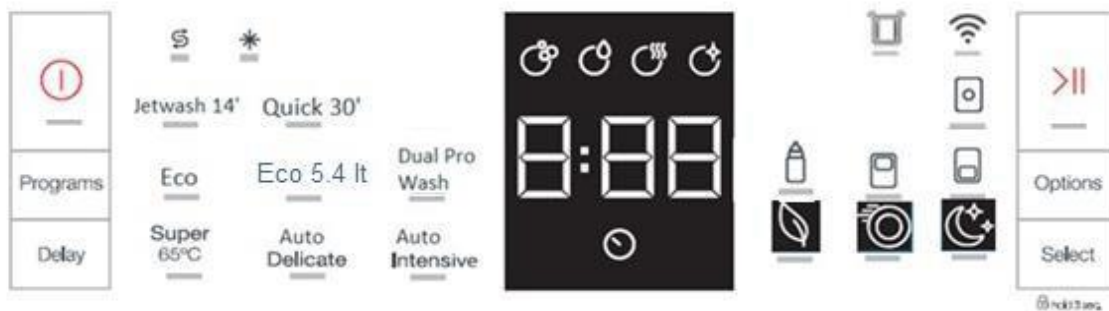

A23

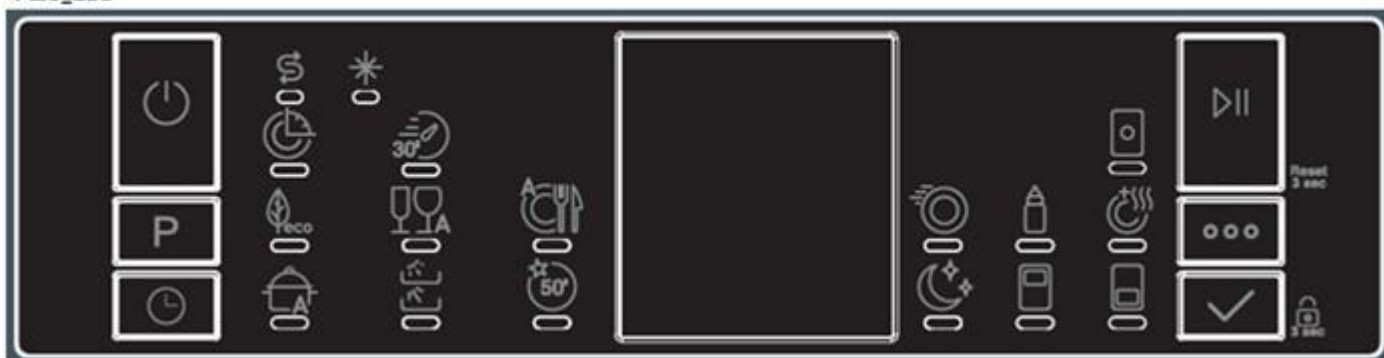

A24

A25

1.6 A SERIES W/ DIVERTER(A31,A32,A33,A34,A35,A36,A37,A38,A39,A3Y,A3Y_UVC)

The user interface includes:

- On/Off button
- Program button
- Program icons
- Delay button
- Rinse aid and Salt icons
- 888 display
- “delay timer active” icon
- Program status with Wash, Rinse, Dry and End icons
- Start/Stop and Reset button
- Option button
- Select button

Note: Old A36 model control panel is removed, and new model panels are added instead.

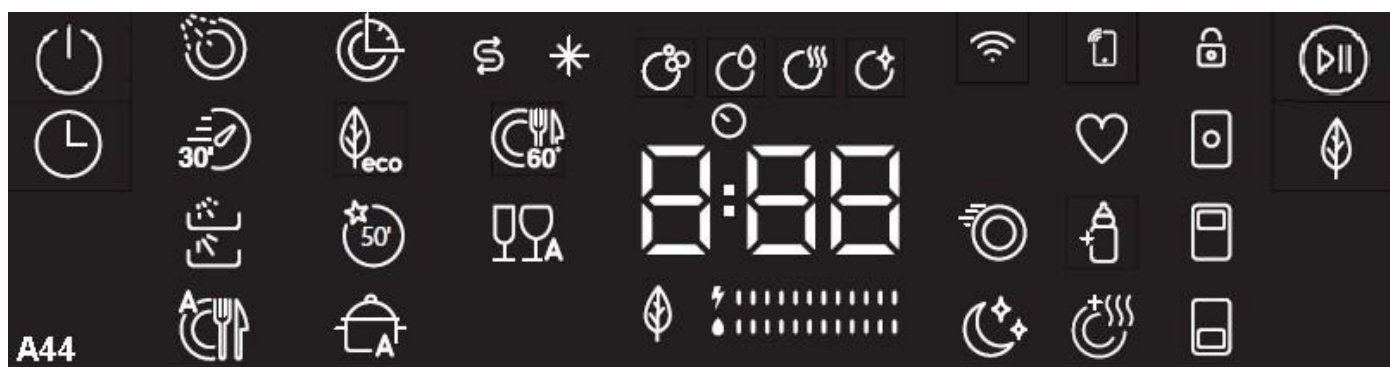

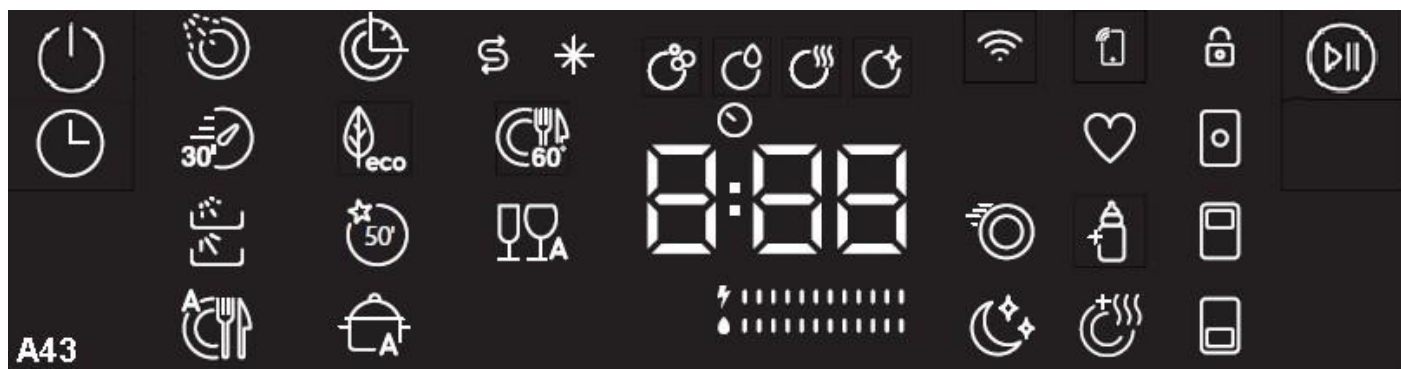

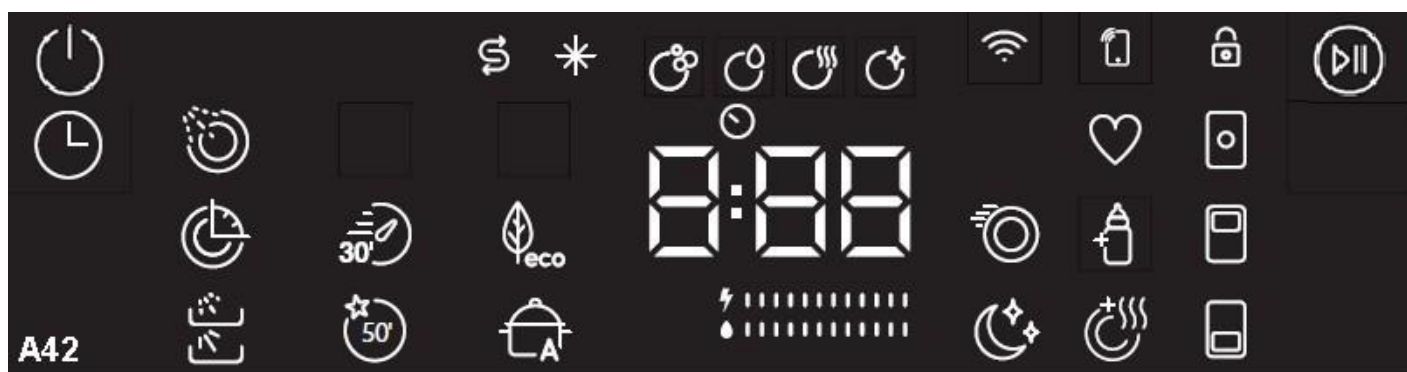

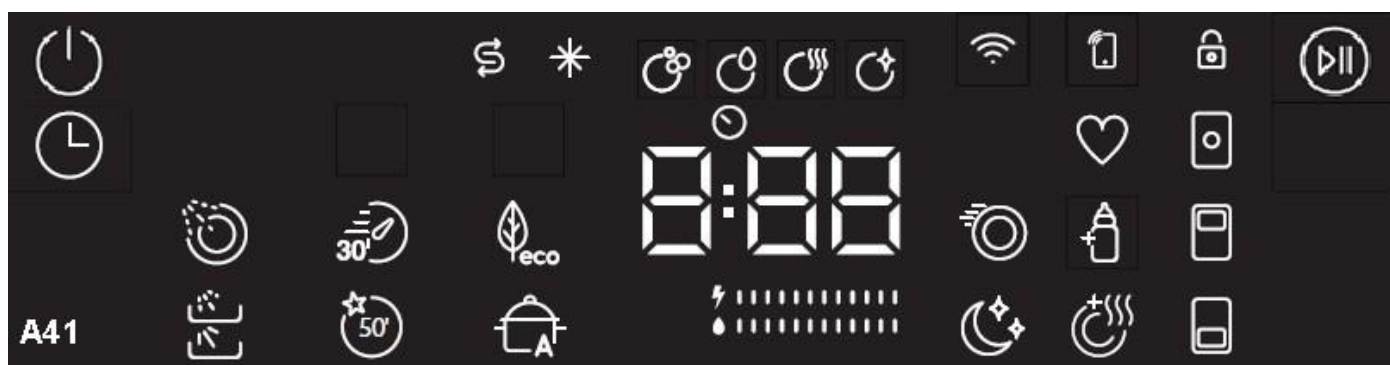

Note: Compared to the A3Y model; on the A3Y_UVCT model, only the Mini 14' program is removed and replaced with the UVC "Crystalight without water" program.

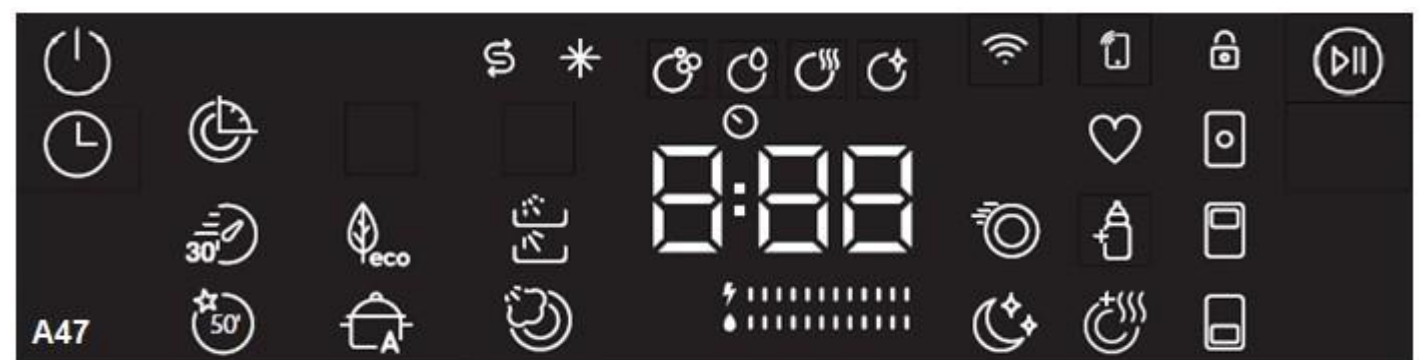

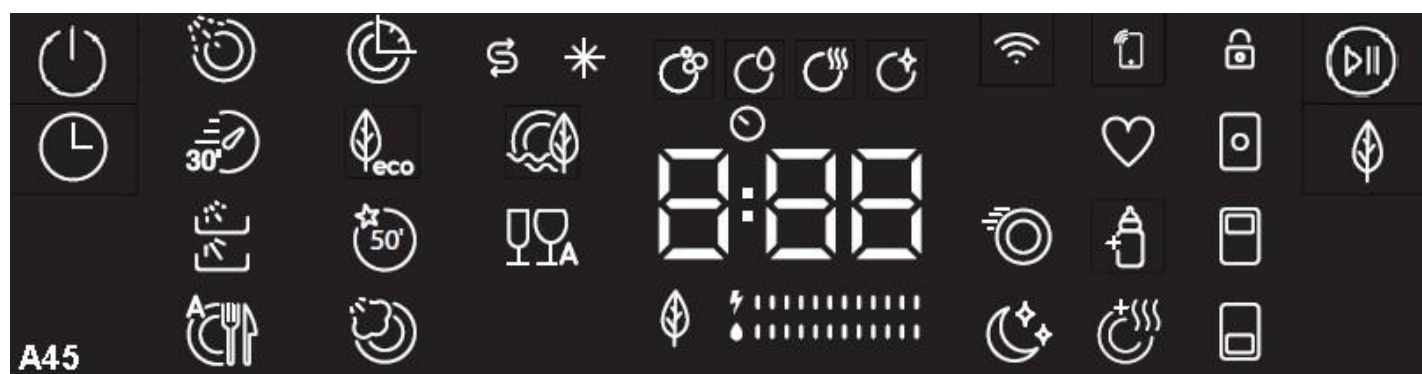

1.7 A SERIES W/ DIVERter and FULL TOUCH DISPLAY(A41,A42,A43,A44,A45,A46,A47,A48,A49,A4Y)

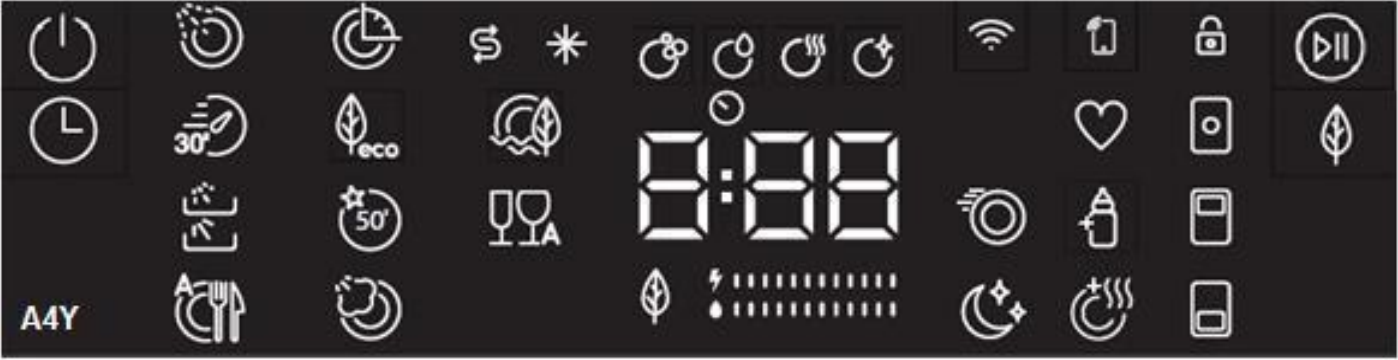

The user interface includes:

- On/Off touch button
- Program touch icons
- Delay touch button

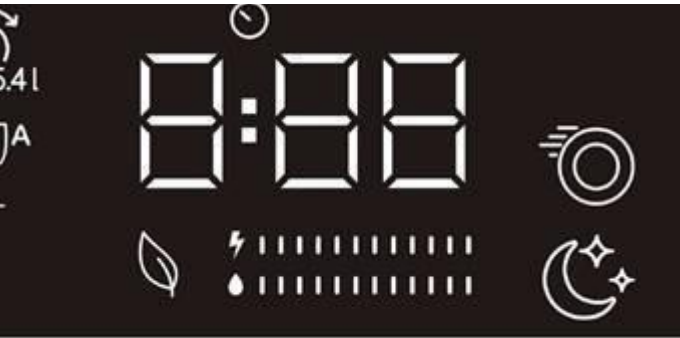

- Energy Save touch icon(if available)
- Rinse aid and Salt icons
- 888 display
- “delay timer active” icon
- Program status with Wash, Rinse, Dry and End icons
- Start/Stop and Reset touch button
- Option touch buttons
- Energy and water consumption status icons

3. WASHING SPECIFICATIONS AND PROGRAMS

3.1 SELECTING AND STARTING PROGRAM AT POWER ON(BEFORE PROGRAM STARTS)

- When the machine is energized, all led + digits should stay lit (A1,A2,A3,A4) until the program information (ready position or any other status, remaining step) is displayed on the display.

When the dishwasher is switched on,

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Switch on	ON	ON	OFF	OFF	OFF
Select program	ON	ON	OFF	OFF	OFF
Pressure of Start/Stop button	ON	OFF	ON	OFF	OFF

When user selects a program, related program led is ON. After pressing Start/Stop button, related program and Wash led are ON.

Note: When user always presses up button, first program follows last program. (ex: Program1-2-3-4-5-6-1-2-...) When user always presses down button, last program follows first program. (ex: Program 6-5-4-3-2-1-6-5-4-..)

For models w/ display;

-the duration of the selected cycle is shown on the display.

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End
Switch on	ON	ON	OFF	OFF	OFF	OFF
Select program	ON	ON	OFF	OFF	OFF	OFF
Pressure of Start/Stop button	ON	OFF	ON	OFF	OFF	OFF

- Default program is "Eco program".

- When the dishwasher is powered off and on again in selection situation, the last executed program and options are not visualized on screen anymore. Every time machine is energized, Eco program is set as default.

3.2 OPENING AND CLOSING DOOR(BEFORE PROGRAM STARTS)**For models w/o display;**

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Door open	ON	ON	OFF	OFF	OFF
Door closed	ON	ON	OFF	OFF	OFF

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End
Door open	ON	ON	OFF	OFF	OFF	OFF
Door closed	ON	ON	OFF	OFF	OFF	OFF

3.3 OPENING AND CLOSING DOOR DURING PROGRAM(NOT IN DRY STEPS)

During the program if the door is opened and re-closed without any modifications on the program button and without the pressure of Start/Stop button, the program continues. Washing program re-starts after 8" if the measured temperature is equal or more than 45°C.

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Door open	ON	Blink	ON	OFF	OFF
Door closed	ON	OFF	ON	OFF	OFF

*When the door is opened, Washled is ON together with the blinking Start/Stop led.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End
Door open	ON	Blink	ON/OFF*	ON/OFF*	OFF	OFF

Door closed	ON	OFF	ON/OFF*	ON/OFF*	OFF	OFF
-------------	----	-----	---------	---------	-----	-----

*When the door is opened, related washing step led is ON together with the blinking Start/Stop led.

3.4 OPENING AND CLOSING DOOR DURING PROGRAM(IN DRY STEPS)

For models w/o display;

During dry step: if the door is opened and re-closed, the program is ended.

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Door open	ON	Blink	OFF	ON	OFF
Door closed	ON	OFF	OFF	OFF	ON

*When the door is opened, Dry led is ON together with the blinking Start/Stop led.

When the door is closed, program ends and End led is ON.

- Next, if user presses program or Start/Stop or delay button, machine is in standby position(last executed programme led and Start/Stop led are ON)
- Then, if user presses Start/Stop button, wash led is ON.

For models w/ display;

During dry step: if the door is opened and re-closed, the program is continued.

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End
Door open	ON	Blink	OFF	OFF	ON	OFF
Door closed	ON	OFF	OFF	OFF	ON	OFF

3.5 OPENING AND CLOSING DOOR DURING PROGRAM(IN REGENERATION FIRST STEP)

During regeneration and resin washing step: if the door is opened and re-closed, the program continues.

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Door open	ON	Blink	OFF	ON	OFF
Door closed	ON	OFF	OFF	ON	OFF

*When the door is opened, Dry led is ON together with the blinking Start/Stop led.

When the door is closed, Dry led is ON.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End
Door open	ON	Blink	OFF	OFF	ON	OFF
Door closed	ON	OFF	OFF	OFF	ON	OFF

3.6 OPENING AND CLOSING DOOR DURING PROGRAM(IN REGENERATION SECOND STEP)

During regeneration and resin washing step: if the door is opened and re-closed, the program is ended.

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Door open	ON	Blink	OFF	ON	OFF
Door closed	ON	OFF	OFF	OFF	ON

*When the door is opened, Dry led is ON together with the blinking Start/Stop led.

When the door is closed, the program ends. Machine is in standby position(last executed programme led and Start/Stop led are ON)

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End
Door open	ON	Blink	OFF	OFF	ON	OFF
Door closed	ON	OFF	OFF	OFF	OFF	ON

When the door is opened and re-closed, program ends and only end led , on/off led, salt/rinse aid lack leds(if salt/rinse aid tanks are empty) are on.

3.7 SELECTING AND STARTING PROGRAM WHEN DOOR IS OPENED(BEFORE PROGRAM STARTS)

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Switch on	ON	ON	OFF	OFF	OFF
Door open	ON	ON	OFF	OFF	OFF
Select program	ON	ON	OFF	OFF	OFF
Pressure of Start/Stop button	ON	Blink*	ON	OFF	OFF
Door closed	ON	OFF	ON	OFF	OFF

*If user presses Start/Stop button, Start/Stop led blinks and also related program led(s)is ON.

After closing the door, Wash led is ON and selected program starts.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End
Switch on	ON	ON	OFF	OFF	OFF	OFF
Door open	ON	ON	OFF	OFF	OFF	OFF
Select program	ON	ON	OFF	OFF	OFF	OFF
Pressure of Start/Stop button	ON	Blink*	ON	OFF	OFF	OFF
Door closed	ON	OFF	ON	OFF	OFF	OFF

If user selects a program when the door is open, related program duration is seen on the display. Then, if user presses Start/Stop button, duration of the selected program led blinks. After closing the door, Wash led is ON and selected program starts.

3.8 TERMINATION OF A PROGRAM(END OF PROGRAM)

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
End of program	ON	OFF	OFF	OFF	ON
Door open	ON	OFF	OFF	OFF	ON
Door closed	ON	ON	OFF	OFF	OFF

When the door is closed, last executed program led and Start/stop led are ON. Namely, Machine is in standby position.

Note: For models w/o display; after program ends, the last executed program led and end led will be on.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End	Digit
End of program	ON	OFF	OFF	OFF	OFF	ON	OFF
Door open	ON	OFF	OFF	OFF	OFF	ON	OFF
Door closed	ON	ON	OFF	OFF	OFF	OFF	OFF

At the end of program, and only end led, on/off led, salt/rinse aid lack leds(if salt/rinse aid tanks are empty) are on. If there is no user intervention during 15 minutes after program has ended, machine turns off completely.

3.9 CANCELLING OF A PROGRAM(DURING PROGRAM)

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Pressure of Start/Stop button 3"	ON	ON	OFF	OFF	Blink
End of program	ON	OFF	OFF	OFF	ON

While pressing the Start/Stop button for 3", End led blinks. After cancelling is finished, "End Led" is ON.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End	Digit
Pressure of Start/Stop button 3"	ON	ON	OFF	OFF	OFF	Blink	"0:01"
End of program	ON	OFF	OFF	OFF	OFF	ON	OFF

For A1 without digit models

- Display shows "0:01" during cancelation process. End led blinks. When cancellation is paused, S/P led blinks. Display is off at the end of the cancelation process and and only end led , on/off led, salt/rinse aid lack leds(if salt/rinse aid tanks are empty) are on.

For A1 with digit, A2, A3, A4 models;

- Display shows "0:01" during cancelation process. Dry led is on. When cancellation is paused, Dry led blinks. Display is off at the end of the cancelation process and and only end led , on/off led, salt/rinse aid lack leds(if salt/rinse aid tanks are empty) are on. (For A1 with digit and A2 models, this is valid from 01.12.2020).

If there is no user intervention during 15 minutes after program has cancelled, machine turns off completely

For both models with and without display:

If cancelling operation is paused, S/P led and end led blinks together.

3.10 IF USER PRESSES ANY BUTTON(AT THE END OF PROGRAM)

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
End of program	ON	OFF	OFF	OFF	ON
Selection of new program or pressed option	ON	ON	OFF	OFF	OFF
Pressure of Start/Stop button	ON	OFF	ON	OFF	OFF

-When user selects a program at the end of program, related program led and Start/Stop led are ON. If selected, related option led(s) is ON.

After pressing Start/Stop button Wash led is ON. If selected, related option led(s) is ON.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End	Digit
End of program	ON	OFF	OFF	OFF	OFF	ON	OFF
Selection of new program or pressed option	ON	ON	OFF	OFF	OFF	OFF	Duration of new program is shown

Pressure of Start/Stop button	ON	OFF	ON	OFF	OFF	OFF	Duration of new program
-------------------------------	----	-----	----	-----	-----	-----	-------------------------

When user selects a program at the end of program, related program duration is shown on the display. If selected, related option led is ON.

After pressing Start/Stop button, program starts and Wash led is ON. If selected, related option led(s) is ON.

3.11 MODIFICATION OF A PROGRAM WITHOUT RESET

The program continues with the flow program but with the parameters (temperature, times) of the new program. In heating step: If temperature is over than the new desired temperature, cut off heating step and go on with the next step with new parameters.

If temperature is lower than the new desired temperature heat up water to the desired temperature level.

In washing step: If the washing duration is over than the washing duration of new program, cut off washing step and go on with next step of new program.

If the washing duration is lower than the washing duration of new program, go on with washing step.

When new program is selected, display duration is changed to same step of new program.

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Washing cycle is in progress	ON	OFF	ON/OFF	ON/OFF	OFF
Pressure of Start/Stop button	ON	Blink	ON/OFF	ON/OFF	OFF
Select new program	ON	Blink	ON/OFF	ON/OFF	OFF
Pressure of Start/Stop button	ON	OFF	ON/OFF*	ON/OFF*	OFF

If user selects new program, related new program led is ON.

*Program continues with the new parameters and related washing led is ON.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End	Digit
Washing cycle is in progress	ON	OFF	ON/OFF	ON/OFF	ON/OFF	OFF	Duration of program
Pressure of Start/Stop button	ON	Blink	ON/OFF	ON/OFF	ON/OFF	OFF	Duration of program
Select new program	ON	Blink	ON/OFF	ON/OFF	ON/OFF	OFF	duration of new program
Pressure of Start/Stop button	ON	OFF	ON/OFF*	ON/OFF*	ON/OFF*	OFF	Duration of new program

*If user presses Start/Stop button, program continues with the new parameters and related washing led is ON

3.12 MODIFICATION OF A PROGRAM WITH RESET

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
----------	--------	------------	------	-----	-----

Washing cycle is in progress	ON	OFF	ON/OFF	ON/OFF	OFF
Pressure of Start/Stop button 3"	ON	OFF	OFF	OFF	Blink
Drain of water	ON	OFF	OFF	ON	Blink
End of Drain	ON	OFF	OFF	OFF	ON*
Select new program	ON	ON	OFF	OFF	OFF

*During the cancellation process End led blinks. After cancelling is finished, and only end led, on/off led, salt/rinse aid lack leds(if salt/rinse aid tanks are empty) are on.

After the cancellation process, if user selects new program, related program led is ON.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End	Digit
Washing cycle is in progress	ON	OFF	ON/OFF	ON/OFF	ON/OFF	OFF	Duration of program
Pressure of Start/Stop button 3"	ON	OFF	OFF	OFF	OFF	Blinks	Duration of program
Drain of water	ON	OFF	OFF	OFF	ON	Blinks	0:01
End of Drain	ON	OFF	OFF	OFF	OFF	ON	OFF
Select new program	ON	ON	OFF	OFF	OFF	OFF	duration of new program

- Display shows "0:01" during reset process.

Display is off and and only end led , on/off led, salt/rinse aid lack leds(if salt/rinse aid tanks are empty) are on at the end of the reset process

3.13 SWITCH OFF THE MACHINE DURING PROGRAM AND BEFORE STARTING PROGRAM

When user presses On/Off button in standby position, machine is changed to Power OFF position and all leds and display are OFF.

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Before starting program	ON	ON	OFF	OFF	OFF
Pressure of On/Off button	OFF	OFF	OFF	OFF	OFF

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End	Digit
Before starting program	ON	ON	OFF	OFF	OFF	OFF	duration of program
Pressure of On/Off button	OFF	OFF	OFF	OFF	OFF	OFF	OFF

3.14 SWITCH OFF THE MACHINE DURING PROGRAM AND AFTER STARTING PROGRAM

When machine is changed to Power OFF position during program, all leds are OFF, display is OFF, Program is paused and all electrical components are stopped. After pressing On/Off button, machine is ON. Selecting any

program does not affect the program flow of previously selected program. Therefore, previously selected program is resumed.

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End
Washing cycle is in progress	ON	OFF	ON/OFF	ON/OFF	OFF
Machine is "POWER OFF"	OFF	OFF	OFF	OFF	OFF
Machine is "POWER ON"	ON	OFF	ON/OFF	ON/OFF	OFF
Select new program*	ON	OFF	ON/OFF	ON/OFF	OFF
Pressure of Start/Stop button	ON	Blink	ON/OFF	ON/OFF	OFF
Pressure of Start/Stop button again	ON	OFF	ON/OFF	ON/OFF	OFF

*New program cannot be selected without pressing Start/Stop button.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End	Digit
Washing cycle is in progress	ON	OFF	ON/OFF	ON/OFF	ON/OFF	OFF	Duration of program
Machine is "POWER OFF"	OFF	OFF	OFF	OFF	OFF	OFF	OFF
Machine is "POWER ON"	ON	OFF	ON/OFF	ON/OFF	ON/OFF	OFF	Duration of program
Select new program*	ON	OFF	ON/OFF	ON/OFF	ON/OFF	OFF	Duration of new program
Pressure of Start/Stop button	ON	Blink	ON/OFF	ON/OFF	ON/OFF	OFF	Duration of new program
Pressure of Start/Stop button again	ON	OFF	ON/OFF	ON/OFF	ON/OFF	OFF	Duration of new program

*New program cannot be selected without pressing Start/Stop button.

Note: If the washing step is Dry before machine is powered off, program ends after machine is powered on.

3.15 CANCELLING OF A PROGRAM (DURING DELAY TIME)

For models w/o display;

COMMANDS	On/Off	Start/Stop	Wash	Dry	End	Selected indicators (delay timer)	Related program led
Pressure of Start/Stop button for 3"	ON	ON	OFF	OFF	Blink	ON	ON
End of program	ON	OFF	OFF	OFF	ON*	OFF	OFF

While pressing the Start/Stop button for 3", selected indicator led(3h, 6h or both 3h and 6h) is ON and related program led is ON.

*During the cancellation process End led blinks. After cancelling is finished, only end led, on/off led, salt/rinse aid lack leds(if salt/rinse aid tanks are empty) are on.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Wash	Rinse	Dry	End	Digit
Pressure of Start/Stop button for 3"	ON	ON	OFF	OFF	OFF	Blinks	Del
End of program	ON	OFF	OFF	OFF	OFF	ON*	dura

While pressing the Start/Stop button for 3", delay duration is shown on display.

*During the cancellation process End led blinks and digit shows "0:01". At the end of cancelling, only end led, on/off led, salt/rinse aid lack leds (if salt/rinse aid tanks are empty) are on.

3.16 MODIFICATION OF A PROGRAM DURING DELAY TIME

- While delay timer is selected but not started or started and paused, if any program button is pressed, delay timer is cancelled and machine goes to ready state. (06.04.2020 tarihinde alınan karar itibarıyla geçerli).

For models w/o display;

COMMANDS	On/Off	Start/Stop	Selected indicators(delay timer)	Related program led
During delay time	ON	ON	ON	ON
Pressure of Start/Stop button	ON	Blink	ON	ON
Select new program	ON	Blink	OFF	New program led is ON
Pressure of Start/Stop button	ON	ON	ON	New program led is ON

New program starts with delay which is selected before.

For models w/ display;

COMMANDS	On/Off	Start/Stop	Delay	Digit
During delay time	ON	ON	ON	Delay duration
Pressure of Start/Stop button	ON	Blink	ON	1" Delay duration, 1" duration of program are shown alternately
Select new program	ON	Blink	OFF	duration of new program is shown
Pressure of Start/Stop button	ON	ON	ON	Delay duration

3.17 SWITCH OFF THE MACHINE DURING DELAY TIME

- While delay timer is active, If machine switch off and on by ON/OFF button, delay timer is cancelled and machine goes to ready position.
- If mains power off-on occurs (power cut); delay time resumes, does not start again, at this time Start/Stop led is ON and related delay led blinks twice.

Note: When user starts a programme with delay and activates child lock: if user switch off/on the machine or power cut occurs; both delay and child lock is active when machine is energized.

Note: When user selects delay time but does not presses Start/Stop button: if user switch off/on the machine, delay timer is cancelled and machine is on standby position.

For models w/o display;

COMMANDS	On/Off	Start/Stop	Selected indicators(delay timer)
During delay time	ON	ON	ON
Standby off	OFF	OFF	OFF
Standby on	ON	ON	OFF

Select new program	ON	ON	OFF
Pressure of Start/Stop button	ON	OFF	OFF

For models w/ display;

COMMANDS	On/Off	Start/Stop	Delay icon	Digit
During delay time	ON	ON	ON	Delay duration
Mains voltage is cut(Power off)	OFF	OFF	OFF	OFF
Mains voltage is back(Power on)	ON	ON	ON	Delay duration blinks twice and then resumes
Select new program	ON	ON	ON	Delay duration
Pressure of Start/Stop button	ON	OFF	ON	1" Delay duration, 1" duration of new program are shown alternately

3.18 BUZZER BEHAVIOURS

COMMANDS	Buzzer
Power On and Power Off	Short beep
Pressure of all buttons	cShort beep
During 3"count down	Short beep(in every second)
During canceling	Short beep(once in two seconds like T24 models)
End of program or cancellation	3*Long beep
Failure situation	2*Short beep+wait+2*Short beep+...
Invalid action	2*Short beep
Note: When machine is turned off automatically 15 minutes after no intervention, buzzer will not sound.	

Note:

For models with digit. during drying step:

- if the machine is turned off and on, the program is ended,
- if the program is paused and started or the door is opened and closed, the program continues where it remains.

For models without digit. during drying step:

- if the machine is turned off and on or program is paused and started or the door is opened and closed the program is ended.

4. POWER FAIL

- **During a Delay Start:** At the power on, program consumes the remaining time.
- **During a Drain + Fill step:** At the power on the program restarts the step to the beginning (with the drain).
- **During a Wash step:** At the power on the program consumes the remaining time.
- **During a Heating step:** At the power on the program continues heating up to the desired temperature. The time out for the heating restart to the beginning (water could be cold again).
- **During a Dry step:** At the power on the program ends.
- **During the first two step of a salt regeneration cycle** (60" REGVALVE = ON or 60" REGVALVE+DRAIN ON): At the power on washing program will continue.
- **During the washing resin step at regeneration cycle:** At the power on the program ends.

It is possible that the power fail occurred when a regeneration cycle is requested. If it occurs:

- During the first two step of a salt regeneration cycle (60" REGVALVE = ON or 60" REGVALVE+DRAIN ON): at the power on washing program will continue.
- After the first two step of a salt regeneration cycle: at the power on the washing program will end and the resin wash will be performed at the beginning of the next washing cycle.

After a Power Fail washing program re-starts without any delay if temp. is less than 45 °C.

After a Power Fail washing program **wait 8"** before re-starts program if temp. is equal or more than 45 °C.

4.1 STANDBY ON/OFF – POWER ON/OFF

	CL is active in standby position	Delay timer is active	CL+Delay timer are active
Standby Off	Machine turns off	Machine turns off	Machine turns off
Standby On	CL is cancelled	Delay timer is cancelled	CL+Delay timer are active
Power Off	Machine turns off	Machine turns off	Machine turns off
Power On	CL is cancelled	Delay timer is active	CL+Delay timer are active

While washing is being operated, CL(which is activated before) is not cancelled if standby or power off/on is done.

5. OPTIONS

5.1 OPTIONS & MODELS

-In case of Power fail during washing, options are stored in memory.

-When the machine is switched on again, the last selected options are active and washing must go on remaining.

-Due to Eco design requirements, each energized of the machine (by pressing ON/OFF) Eco program must be fixed as default, the options that are chosen before will be cancelled.

- In case of Power fail, options are stored in memory if it occurs in washing cycle.
- For models with display; At the end of the program, when drain step is performed, only the third digit that is on the right of display will be ON. (It shows only one "0"). Then, when the users push any button, display shows the total time of the program).

For all A models, each energized of the machine (by pressing ON/OFF), Eco program will be set as default setting. And the options that are chosen before (i.e: ~~child lock~~, delay option etc...) will be cancelled.

Note: If user activates child lock then turns off/on the machine or power cut occurs; child lock will be active when machine is energized. **(valid from 22.09.2020)**

Note:

For A2 60 and 45 cm models: after any program selection, if the Option button is pressed repeatedly, only the options that are compatible with that program will be on. The incompatible options are skipped. **(valid from 15.01.2021)**

For A3 60 and 45 cm models: when any program is selected, only the option icons that are compatible with that program will be half on. The incompatible options must be off. If the Option button is pressed repeatedly,

only the options that are compatible with that program will be on. The incompatible options are skipped. **(valid from 15.01.2021)**

For A4 60 and 45 cm models: after any program selection, only the options that are compatible with that program will be half on. The incompatible options must be off. **(valid from 15.01.2021)**

For A0 models w/o diverter;

- All options can be selected with eco 5.4lt program. But, when any option is selected in eco 5.4lt program, software start economic 50C program with options that is selected instead of eco 5.4lt.

5.4 OPTION DEFINITION

Option	Short description
Delay Timer	Program starts with a delay
Half Load(3 modes)	The wash is executed with upper spray, lower spray or both in half load mode.
Tablet	Change of washing temperature and time
Child Lock	It can be activated by pressing related buttons at the same time for 3 seconds(see 5.4.4) Buttons are blocked to press.
Extra Hygiene	Increase the washing temperature at final rinse step in order to eliminate bacteria
Extra Dry	This option increases water temperature at final rinse step and increase drying step duration up to 10 min.
Extra Rinse	Extra rinse option adds an extra rinse step to achieve more hygienic washing. Programme duration is increased between min. %4 and max. %16 according to washing programme
Energy Save	At the end of the drying process, the dishwasher door automatically opens to allow steam to escape and cool air to circulate. For A24, A25, A33, A34, A35, A44, A45 models; when the machine turned on, energy save is active for only Eco program as default. This option can not be selected after program starts or paused.
Extra Fast	Reduces the duration of the washing. (Sadece programa ilk start verilmeden seçilebilir.)
Extra Silent	Reduces the sound pressure level of the washing This option can not be selected after program starts or paused.

Note: While option selection, related option led blinks. When user activates option and its led becomes on, next option led starts to blink.

Selecting the Options

5.4.1 Delay Timer

The delay timer option is selected by pressing the regarding button before the program starts. It is possible to select the delay before selecting the program.

Before program is started, all indicator leds and delay led are OFF.

For models w/o display:

When delay button is pushed first,

- 6h led is OFF, and 3h led is ON. (It means program starting is delayed 3 hours)

When delay button is pushed second,

- 3h led is OFF, 6h led is ON. (It means program starting is delayed 6 hours)

When delay button is pushed third,

- 3h and 6h leds are ON. (It means program starting is delayed 9 hours)

When delay button is pushed fourth,

- 3h and 6h leds are OFF. (It means delay process is cancelled)

If user presses Start/Stop button when a delay time is selected, the program with delay will be in operation. Start/Stop led is ON.

When user activates 9h delay timer, after 3 hours 9h leds becomes off. Only 6h led is on. After 3 more hours is passed, 6h led becomes off and 3h becomes on.

When user activates 6h delay timer, after 3 hours 6h led becomes off and 3h led becomes on.

For models w/ display:

Before starting the program,

- Delay is selected by consecutive pressures of the button. Delay led is ON.
- At each pressure, the display shows one step of increment (from H:01 to H:24); having been reaching its maximum value (H:24)
- If user hold pressing continuously, delay timer starts counting faster (acceleration is proportional to the hold pressing time). In case of a long period of time pressed to delay button, counter stops at "H:00".
- The next pressure clears the delay and shows "H:00".
- Before pressing Start/Stop button, selected program duration and delay durations are shown on the display alternately in 2" interval.
- After pressing Start/Stop button, Delay led blinks once, delay duration is shown on the display and the program with delay will be in operation.

Cancelling the delay start is possible during the delay time.

- Press the delay button, until the delay time is "H:00"
- Press Start/Pause button and the washing program will start.
- Switch Off and On the machine

- When delay timer is selected, if machine switch off and on by ON/OFF button, delay timer is cancelled and machine goes to ready state.
- If mains power off-on occurs (power cut); delay time resumes, does not start again.
- When delay timer is selected but not started or started and paused, if any program button is pressed, delay timer is cancelled and machine goes to ready state. (06.04.2020 tarihinde alınan karar itibarıyla geçerli).

After the delay timer starts counting down,

- if the option changes, delay timer continues down from the time when option is changed.
- If the delay time is changed; delay starts from the beginning of the new delay time.

5.4.2 Half Load

For models w/o display;

Half load is enabled/disabled by pressing “Half load” button”.Half load led is ON.

For models w/ display-w/o diverter;

Half load is enabled/ disabled by pressing “Half load” button once and Half load led becomes ON.

For models w/ display-w/ diverter;

If neither half load option is selected before, “Upper Basket” and “Lower Basket” leds are OFF.Half Load option is selected before program start by pressing “options” button.

When Options button is pressed:

First time: Tablet led blinks.

Second time: Tablet led is OFF. Upper Basket led blinks. In order to select Upper Basket option, press select button and Upper Basket led will be on. Then, first option led start to blink. Wash is executed only with upper spray arm.

Third time: Upper Basket led is OFF and Lower Basket led blinks. In order to select Lower Basket option, press select button and Lower Basket led will be on. Then, first option led start to blink. Wash is executed only with lower spray arm.

5.4.3 Tablet

Tablet option is selectable at any time. If it is pressed during a washing program the program will execute the following steps with “tablet” functions instead of the normal.

For models w/o diverter;

Tablet option is selected by pressing “Tablet” button. Tablet led is ON.

For models w/ diverter;

Tablet option is selected by pressing “Options” button until tablet led blinks and pressing “select” button.

When user selects tablet option, main wash temperature is determined according to tablet temperature under no circumstances. Even if another option or automatic program is run together with the tablet option.

Temperature value of tablet option is determined according to dissolution temperature of tablet detergent.

5.4.4 Child Lock

For A0 models w/ display;

Child lock is enable/disabled by pressing “Delay” and “Start/Pause” buttons for 3”.

When lock is enabled, all leds blink and Display shows “CL” once

When lock is disabled, all leds blink and Display shows “CL” twice

When lock is enabled and a button is touched, all leds blink and Display shows “CL” twice

For models w/o display-w/o diverter;

Child lock is enabled/disabled by contemporary pressure of “Tablet” and “Delay” buttons for 3”. When it is activated, child lock led is on.

If lock is active and the buttons are pressed, the Child lock led blinks once.

For models w/ display-w/o diverter;

Child lock is enable/disabled by pressing “Tablet” button for 3”.

For models w/ display-w/ diverter;

Child lock is enable/disabled by pressing “Select” button for 3”.

For A4 model;

Child lock is enabled by touching Child lock icon on the display for 3".

When lock is enabled, all leds blink and Display shows "CL" once

When lock is disabled, all leds blink and Display shows "CL" twice

When lock is enabled and a button is touched, all leds blink and Display shows "CL" twice

Note: When user starts a programme with delay and activates child lock: if user turn off/on the machine or power cut occurs; both delay and child lock is active when machine is energized.

Note: If user activates child lock then turns off/on the machine or power cut occurs; child lock will be active when machine is energized. **(valid from 22.09.2020)**

Valid from 11.01.2021; in any mode (ready, run, pause, end, delay start), while the child lock is active,

- if the machine turns off and on again by on/off button, the child lock will stay active when the machine is energized. It will not be cancelled.
- if the mains power (220 V) is cut and machine is energized again, the child lock will be cancelled. (For the first phase of Vel sw's this behaviour is same with on/off button, this will be implemented on the 2nd phase)
- If the machine is turned off automatically 15 minutes after any usage, the child lock will stay active when the machine is energized.
- If the power cut occurs after machine is turned off by on/off button, the child lock will stay active when the machine is energized.

5.4.5 Extra Options (for models w/ display)

Extra option is selected before program start by pressing "Options" button and regarding led is ON.

When Options button is pressed;

First time: Tablet led blinks.

Second time: Upper basket led blinks.

Third time: Lower basket led blinks.

Fourth time: Hygiene led blinks, all the other leds are OFF. Wash is executed with the following steps with "Hygiene" functions instead of the normal.

In models with Auto Door, 4th led is Energy save. So, Energy Save led is on instead of Hygiene.

Fifth time: Rinse led is blinks, all the other leds are OFF. Wash is executed with the following steps with "Rinse" functions instead of the normal.

In models with BLDC, 5th led is Extra Fast. So, Extra Fast led is on instead of Rinse.

Sixth time: Dry led blinks, all the other leds are OFF. Wash is executed with the following steps with "Dry" functions instead of the normal.

In models with BLDC, 6th led is Extra Silent. So, Extra Silent led is on instead of Dry.

Seventh time: Tablet led blinks.

In order to select a desired option, user must press Select button after desired option's led is on. When user selects option and its led becomes on, first option led starts to blink.

Note: Hygiene and Dry options cannot be selected together. Hence, Hygiene+Dry+Rinse cannot be selected also.

Note: Fast and Silent options cannot be selected together. Hence, Energy save + Fast + Silent cannot be selected also.

Note: For A2, A3 models; after selection of any option, the new option selection starts with the next of the before selected option. (It is valid for new models- 01.03.2020)

5.4.6 Favourite Program

User selects program and option(s). Then presses button combination for favorite program storing. When the favorite program is stored, related program and option leds blink once.

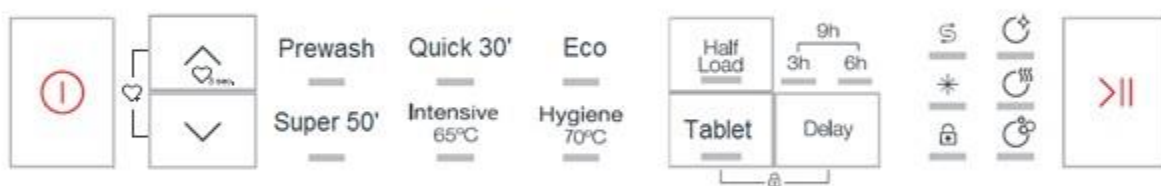

To activate favorite program, user presses button for favorite program selection during 3". Then, related program and option leds become on.

Favorite program storing and activation can be done in standby and pause mode.

(If no favourite program was selected before, and if the favourite program is selected, the latest program and option is saved as favourite program)

A1 without display:

A15

button combination for favorite program storing : up + down buttons

button for favorite program selection: up button

A1 with display A2 and A3:

A1E

button combination for favorite program storing : program + delay buttons

button for favorite program selection : program button

5 SOFTWARE REQUIREMENTS

6.1 HEATER

Heating relay must be switched with un-supplied Heater.

- Stop Circulation Pump.
- Wait for pressure switch certainly open.
- Open/Close Heater Relay
- Wait (Heater relay certainly close);
- Start Circulation Pump.

If Tablet is selected, heating steps must be < 55°C for steps before last rinse.

6.2 WATER FILL

Water Load is obtained by flow meter signals. When a fixed quantity of water is loaded, the reaching water level is checked by the activation of circulation pump. When the pressure is high enough, the pressure switch is activated.

For 1L water inlet, MCU must detect 210 Pulse/L (with +-5% tolerance) from flowmeter .

At the start program a drain 20" + empty is executed before fill.

When Inlet valve is ON, if there aren't flow meter impulses, failure routine of "absence of flow meter impulses routine" works (see on failure chapter).

If pressure sensing switch turns OFF during the wash, after a drain +20", another water load is executed (also see "return empty level" failure in failure chapter).

Water fill must work;

- Pressure > 0,8l: all OK
- 0,3<pressure<0,8l: OK with time out
- Pressure < 0,3l: stop cycle.

Water fill is performed spray arms start.

Note:

A1: upper spray arm and lower spray arm start together.

A2-A3-A4: lower spray arm starts.

6.3 WATER DRAIN

Water drain starts with drain pump ON for 33". After 30", circulation pump ON. When empty level is recognized (by pressure switch signal), the circulation pump stops and the machine continues for the request steps.

If pressure switch level doesn't switch in Empty level (during circulation pump on), failure of Water drain works (see 8.failure routines).

Water drain is performed with lower spray arm

Note:

A1: drain is performed with upper and lower spray arms.

A2-A3-A4: drain is performed with lower spray arm.

Detergent dispenser step

After wash+heating step is started 3 seconds, Dispenser is activated during 0,3 seconds. If power fail or opening door or pushing Start/Stop or switching OFF is happened, Detergent dispenser step is started again.

A2: for the detergent step 2' of upper spray arm are performed.

Rinse aid dispenser step

Dispenser is activated 8 seconds for each dosage. There are 8 seconds between two activations. If power fail or opening door or pushing Start/Stop or switching OFF is happened, Dispenser activation resumes.

If the door is opened and re-closed during washing program, without a re-start program, detergent dispenser must return in Rinse aid distribution state.

A2: for the rinse aid step 2' of upper spray arm is performed.

Sliding dispenser dosages are shown below in detail.

1 rinse aid dosage is performed when dispenser is ON during 8" and OFF during 8". =>1,5cc

2 rinse aid dosages are performed 8" ON-8" OFF-8" ON-8" OFF=>3cc

3 rinse aid dosages are performed 8" ON-8" OFF-8" ON-8" OFF-8" ON-8" OFF=>4,5cc

4 rinse aid dosages are performed 8" ON-8" OFF-8" ON-8" OFF-8" ON-8" OFF-8" ON-8" OFF=>6cc

<i>Action</i>		<i>New(Sliding dispenser)</i>	
Detergent cover opening:		0.3"	
Rinse aid dose:	Dose setting:	Automatic in the software	
	Dose quantity and time to delivery	1 - 0cc	OFF
		2 - 1.5cc	8"ON; 8"OFF
		3 - 3cc	8"ON; 8"OFF
		4 - 4.5cc	8"ON; 8"OFF
		5 - 6cc	8"ON; OFF
		n/a	n/a

	Standard dose of rinse aid setting by manufacturer	(4-4,5cc set by software)
--	---	---------------------------

6.4 REGENERATION CYCLE

When it occurs the regeneration valve works after last rinse and during the drying steps. There are 6 hardness levels.

Water Hardness level	Litres
Level 1	Never
Level 2	116 lt
Level 3	64 lt
Level 4	52 lt
Level 5	46 lt
Level 6	16 lt

The consumed liters are counted by flow meter impulses.

In case of flow meter broken, the liters corresponding at the flow meter time out are used

If user cancels a program during regeneration or after regeneration and before resin wash, at the beginning of the next program the dishwasher performs the resin wash to remove the salty water from the resin chamber. The resin wash will be: load 2 lt of water with drain pump on. During the resin wash the circulation Pump must be off.

Regeneration is not performed at prewash program

If water hardness level is changed from lower to higher, regeneration cycle is performed at the end of the first program
If water hardness level is changed from higher to lower, regeneration cycle is not performed at the end of the first program. Regeneration is performed after water level reach to value of level

- If Water hardness level is 5 or 6
 - First regeneration step is performed 0,2lt water
- If Water hardness level is 2 or 3 or 4
 - First regeneration step is performed 0,1lt water
- If Water hardness level is 1
 - Regeneration step is not performed

-The consumed liters are counted by FLM(flow meter) impulses.

-In case of FLM broken, the liters corresponding at the FLM time out are used. (2,1 lt + 2,5 lt).

-In case of "Tablet" option is ON ;

- *If the level set is less than L4: the regeneration cycle is not performed, but the quantity of consumed water is counted. When the target value is reached, at the first cycle without the "Tablet" ,the regeneration cycle is performed.
- *If the level set is equal or more than L5: the regeneration cycle is performed when the quantity target is reached.

-If the washing program is a "prewash program", the regeneration cycle is not performed.

-If user cancels a program during regeneration or after regeneration and before resin wash, at the beginning of the next program the dishwasher performs the resin wash to remove the salty water from the resin chamber. The resin wash will be: load 2 lt of water with drain pump on.

-During the resin wash, the circulation Pump must be OFF.

-If the level of regeneration step is incremented, (for ex:from level3 to level 6) ,at the end of the next washing cycle, it must perform resin wash.

-If the regeneration level is decremented, (for ex: from level4 to level 3); checked how much water used until then and according to new level, how much water will be used more for resin wash is calculated.(level 3=64 lt- used liters until then).

-During waiting step of regeneration process, end user open/close the door or Power OFF /ON condition, program goes to END, but next step of washing cycle starts with resin wash, so that water level resets to zero and re-counts down from corresponding water level.

- When there is no flowmeter connection (by removing flowmeter cable), Electronic card saves the water as 4,58 lt per step.

-If there occurs regeneration step after the programs without drying step or programs having less than 15min drying step, at the end of the program (before reg cycle) the duration must be corrected from 0:01 to 0:15 and recount down during reg step.

6.5 FEATURE OF TIME PHASE

- At the beginning of the main wash of eco program, If temperature of water < 30C , Time phase is not activated at the main wash of eco program
- At the beginning of the main wash of eco program, If temperature of water > 30C , Time phase is activated at the main wash of eco program
- These two rules cover only eco programs.

6.6 VOLTAGE SENSING CONTROL

When main supply voltage is below 145VAC, voltage sensing circuit detect low voltage and program is stopped by software.

Take memory failure code of low voltage to show at the beginning of service test.

After main supply voltage is above 155VAC, program is started again

When main supply voltage is above 285VAC, voltage sensing circuit detect high voltage and program is stopped by software.

Take memory failure code of high voltage to show at the beginning of service test.

After main supply voltage is below 275VAC, program is started again

- If voltage is low or high during 3 hours or more, at the end of the 3 hours:
 - Program go to failure routine without draining, Failure code of low voltage is shown to user
 - Program go to failure routine without draining , Failure code of high voltage is shown to user

For 110V models: Low voltage detection is not available, only high voltage is detected as following:

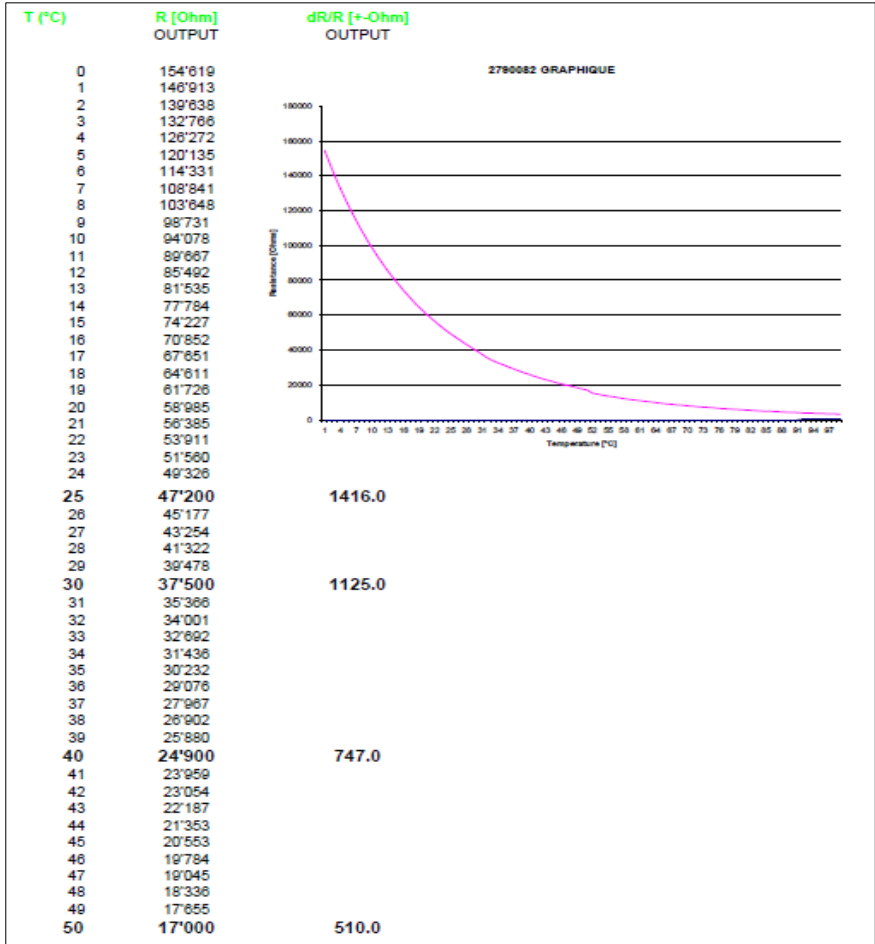

When main supply voltage is above 145VAC, voltage sensing circuit detect high voltage and program is stopped by software.

Take memory failure code of high voltage to show at the beginning of service test.

After main supply voltage is below 135VAC, program is started again

- If voltage is high during 3 hours or more, at the end of the 3 hours:
 - Program go to failure routine without draining , Failure code of high voltage is shown to user

93	3'944	
94	3'825	
95	3'709	
96	3'598	
97	3'491	
98	3'387	
99	3'287	
100	3'190	

6.8 WATER HARDNESS SET

Only service can execute this procedure. This procedure erases the cycle counter. For AU Y models, water hardness level is level 1 as default.

For models w/o display;

- Power ON and press Up button at least for 3". (a bip voice will sound when salt setting is recognized)
- If "Hardness set" is recognized all leds blink for 2". This means that all leds blink once.
- Release Up button. The last setting level is viewed*.
- Press Up button to increase
Press Down button to decrease the level.

At any pressure of up button hardness level is increased.

For A0 models, press Start/Pause button to increase; press delay button to decrease the level.

Hardness level 1 returns after hardness level 6.

At any pressure of down button hardness level is decreased. Hardness level 6 returns after hardness level 1.

* If it is the first hardness set, hardness level is level 3.

Level	Wash	Dry	End
1	FIX	OFF	OFF
2	OFF	FIX	OFF
3	OFF	OFF	FIX
4	FIX	FIX	OFF
5	FIX	OFF	FIX
6	OFF	FIX	FIX

For models w/ display;

- Power ON and press program button at least for 3". For A4 models, use delay button and press it for 3".
- If "Hardness set" is recognized "SL" is shown for 2".
- Release program button. The last setting level is viewed*.
- Press program button to set the desired level.

At any pressure of program button hardness level is incremented. Hardness level 1 returns after hardness level 6.

Level	Display
1	L1
2	L2
3	L3
4	L4
5	L5
6	L6

* If it is the first hardness set, hardness level is L3.

6.9 RINSE AID SET

In order to enter rinse aid set, user applies below steps.

- Power ON; press Up button at least for 5" for models without display → (double bip voice will sound when rinse aid setting is recognized)
- Power ON; press Program button at least for 5" for models with display. For A4 models, use delay button and press it for 5".
- If "Rinse aid set" is recognized;
 - all leds blink twice if model is without display.
 - If model has display, "rA" is shown.
- Release program button. The last setting level is viewed*.
- Press program button to set the desired level.

At any pressure of program button rinse aid level is incremented.

For A0 models, press Start/Pause button to increase; press delay button to decrease the level.

The level 1 returns after level 5.

For models without display; rinse aid levels are the same with water hardness levels as shown in the table.

Level	Wash	Dry	End
1(0cc)	FIX	OFF	OFF
2(1,5cc)	OFF	FIX	OFF
3(3cc)	OFF	OFF	FIX
4(4,5cc)	FIX	FIX	OFF
5(6cc)	FIX	OFF	FIX

For models with display;

Level	Display
1(0cc)	r1
2(1,5cc)	r2
3(3cc)	r3
4(4,5cc)	r4
5(6cc)	r5

* If it is the first rinse aid set, Default rinse aid level is 4 which corresponds to 4,5 cc.

If the rinse aid tank is empty and user sets rinse aid level as 1(0cc), "lack of rinse aid" warning is not shown.

6.10 IONIZER(for A1 with T board,A2,A3,A4)

When machine is powered on, Ionizer function can be activated/deactivated by pressing Options button for 3". For A4 models, use upper basket touch button. Display shows "Ion". During activation of ionizer, display counts 1-2-3-Ion. During deactivation of ionizer, display counts 1-2-3 and machine goes ready state.

Also, when machine is turned off and then on, ionizer function is cancelled.

Ionizer cycle is as follow: 5' ON, 55' OFF, 5' ON,55' OFF,.. After 24 hours is completed, ionizer function is deactivated automatically by software.

During 5' ON; ionizer led and ionizer fan work together. During 55", they do not work.

Ionizer must not work within a program. When ionizer is activated, selected options are resetted.

When the door is opened, ionizer+mini fan stops. They do not work.

If ionizer is active, Ion led and inner light are on when the door is opened. Ion led lights up like dimming.

For A1 models using T board; ionizer activation buttons are as below:

A1 w/o display models using BM05: press down button for 3"

A1 w display models using BM05: press delay and tablet buttons for 3"

When Ion is active:

- 1st and 2nd program leds are on for A1 w/o display models
- Ion is shown on the display for A1 with display models.

Ionizer function can be cancelled

Note: If the model has ION; When the ion is activated and the door is closed, the ionizer mini fan operates. Since the connection of ionizer mini fan and UVON LED is common in hardware, they both work together. Thus during ion mini fan working, the uvon LED is also on or vice versa.

6.10.1 UVON Tect

Uvon function are optional for only BLDC models. Asynchronous models do not have this function.

For 60 cm BLDC models:

UVON function is activated/deactivated by pressing "Options" button at least 6". Meanwhile, display counts from "1 to U1/U0" (1-2-3-ION-4-5-U1/U0 justified to right) alternately and they show "U1" for 2" to indicate that Uvon is activated or 'U0" for 2" to indicate that uvon is deactivated. If user presses less than 6", Ion is activated.

UVON is active only in program having drying phase. If UVON is activated and washing program is started, UV led turns on during the first 10 minutes of drying phase.

UVON led is driven from the same output with ionizer fan.

Also, if regeneration occurs and UVON is active, UV led is on during the first 10' of regeneration.

Default set is U0.

At the end of program, if user don't deactivate it, UVON remains active until machine is turned off and on.

UV led is never ON when the door is open. Status of leds are given below:

State& UVON	UVON is OFF		Standby & UVON is ON		Program is washing & UVON is ON		During first 10' of Drying Phase & UVON is ON		After first 10' of Drying Phase & UVON is ON		Program is end & UVON is ON		After machine is turned off and on, UVON turns OFF	
Door	open	close	open	close	open	close	open	close	open	close	open	close	open	close
UV-A led	x	x	x	x	x	x	x	✓	x	x	x	x	x	x
Ionizer leds	x	x	✓	x	✓	x	✓	x	✓	x	✓	x	x	x

Note: If UVON is active, Ion led lights up like dimming during the door is open.

X: led is off

✓:led is on

For A24 7, A33-A34 7, A41-A42 7, A44 7 (45 cm) models:

For only these slim models, since UV is driven same pin with DC fan, UV led is on during the fan is active on the drying phase with fan as default. During the drying without fan, UV led is off. (UV led lighting does not depend on whether it is activated or deactivated by pressing related button.)

UVC NOTE: In models with only UVC, only the following feature will be different than normal:

- There is no ion function, UV is activated/deactivated by pressing the relevant button for 3 seconds. In the form of 3-2-1-U0 / U1.

UVC on TOP: Features that is spesific for models including UVC on top of tub are listed in below:

- Includes Waterless Crystalight 20' (UVC) program instead of any existing program depending of the model. If this program selected or started, program minutes and "ULC" appears on the display alternately.
- If UVC (with water) option is activated, it only works at the last 3 minutes of the drying phase of any program (instead of first 10 minutes on current models).

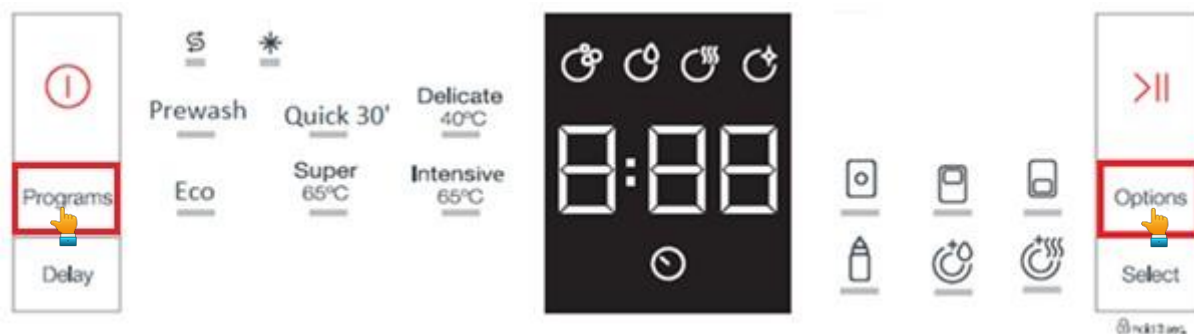

6.11 DEFAULT TURBIDITY(for A21,A22)

A21 and A22 models with sliding dispenser have default turbidity function. Thanks to this, auto program works when turbidity is connected. Intensive program works when turbidity is not connected.

Models with turbidity contains FA error, the others does not.

6.12 INNER LIGHT(for A1 w/ display A1 models using T board,A2,A3,A4)

Machine must be ON position during activation and deactivation of inner light modes. Open or close position of the door is not important.

How to change from “ECO MODE” to “NORMAL MODE” for Inner Light option

First energize the machine via On/Off button. (if it is in OFF position).
Press Program and Options buttons for 3 seconds.

For A1 with display; press Program and Half load buttons for 3 seconds.

For A1 without display(using BM05); press UP and Half load buttons for 3 seconds. If Normal mode is on, Wash+Dry leds turn on.

“IL0” will be shown in the display for 2 seconds to show the “Normal Mode” is selected for inner light option.

After “Normal Mode” is selected, the inner light will be ON as long as the machine is energized and machine door is open.

How to change from “NORMAL MODE” to “ECO MODE” for Inner Light option

First energize the machine via On/Off button. (if it is in OFF position).

Press Program and Options buttons for 3 seconds. For A1 with display; press Program and Half load buttons for 3 seconds.

“IL1” will be shown in the digit display for 2 seconds to show the “Eco Mode” is selected for inner light option.

For A1 w/o display models: If Eco mode is on, Wash+Dry+End leds turn on.

Also inner light turns OFF and ON again (blinks momentarily) to show this selection is activated.

After “Eco Mode” is selected, the inner light will be ON for 2min after machine door is opened and then turns OFF.

If any user intervention occurs such as pressing buttons, Eco Mode cycle starts from beginning (inner light is ON for 2min and then becomes OFF again)

For all A models, in ready state (when the machine is in ready mode, after the end of program, or, after the program is cancelled) if there is no intervention for 15 minutes, machine turns off except washing mode (except when WIFI REMOTE CONTROL is active)

When Wifi Remote Control is ON Machine does not turn off automatically. The screen goes to sleep mode 15 minutes after the ready state or program finished.

LED's do not change the operation or brightness in Eco mode.

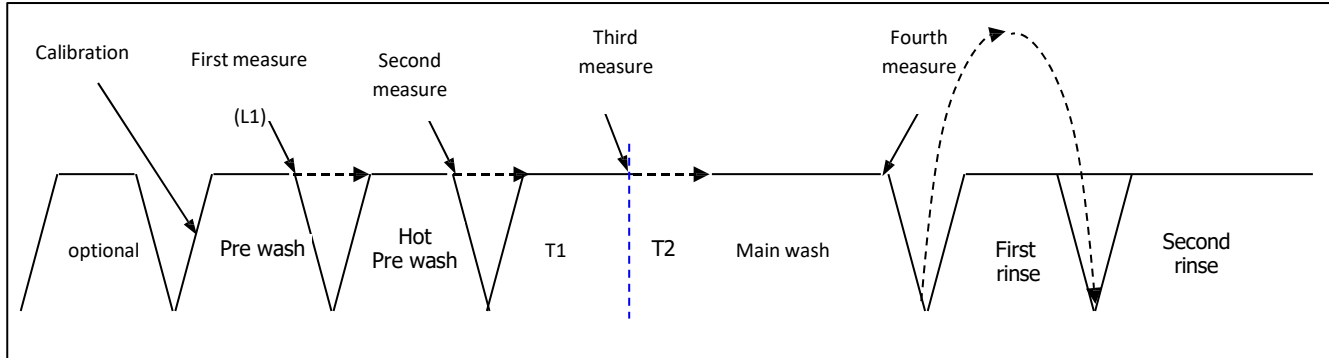

For models with interior light, the interior light becomes off 2 minutes after the door is opened.

Factory setting for inner light is set to “IL1”.

For A4 series, inner light combination button is lower basket touch button. Press it for 3” to enter inner light set.

6.13 AUTOMATIC PROGRAM(TURBIDITY SENSOR)

Turbidity sensor is performed in the “auto delicate”, “auto normal” and “auto intensive” programs.

- 1) The calibration is executed after reaching P1 level in the first filling step.
- 2) The first measure is executed at the end of pre-wash.
 - If turbidity is \leq TURBIDITY-LEVEL 1: drain is skipped.
 - If turbidity is $>$ TURBIDITY-LEVEL 1: drain is skipped.
- 3) The second measure is executed at the end of hot pre-wash.
 - If turbidity is \leq TURBIDITY-LEVEL 2: Drain is skipped.
 - If turbidity is $>$ TURBIDITY-LEVEL 2: Drain is skipped.
- 3) The third measure is executed after the first heating step in the main wash.
 - If turbidity is \leq TURBIDITY-LEVEL 3: The second heating step is skipped
 - If turbidity is $>$ TURBIDITY-LEVEL 3: The second heating step is performed (T24_7 is performed)
- 4) The fourth measure is executed at the beginning of rinses.
 - If turbidity is \leq TURBIDITY-LEVEL 4: First rinse is skipped.
 - If turbidity is $>$ TURBIDITY-LEVEL 4: First rinse is executed.

The levels :

TURBIDITY-LEVEL 1 = 3,0V

TURBIDITY-LEVEL 2 = 3,4V

TURBIDITY-LEVEL 3 = 3,7V

TURBIDITY-LEVEL 4 = 3,8V

In case of break of turbidity sensor, the Automatic cycle is entirely executed. The fault is not reported.

6.14 AUTODOOR OPEN SYTEM

Energy save option is not selectable at any time. During program, energy save option cannot be cancelled or cannot be added. If user presses energy save button during program, the buzzer gives a long sound that is activated to warn that this is not a valid command.

Energy save option is enable by firstly pressure of Extra button (Energy save led lights up) before starting the program.

Energy save option is disabled by pressing Extra button until Energy save led turns off.

- When option is selected, The door is opened by the Door Open System at the end of washing program.
- Program in the 1 (Last 1 minute before program finishing)
 - Start to count 2 minutes in the memory
 - TY4 triac is driven by microcontroller and door open system is energized
 - The buzzer gives sound (1"ON + 4"OFF) until auto door mechanism open the door
 - There is 1 on the display during this time.
- When Auto door mechanism open the door

- TY4 triac is not driven by microcontroller
- There is 0 on the display.
- Stop to count 2 minutes in the memory
- If Auto door is not opened in 2 minutes
 - TY4 triac is not driven by microcontroller
 - There is 0 on the display.
 - FC failure code is saved to memory

Machine must be ON position during activation and deactivation of door open system. Position of the door (open/close) is not important to activate/deactivate the system. But during washing cycle, it is not enabled to activate /deactivate to this feature.

NOTE: For A4, the energy save button (without LED) has only touch feature and when it is active or deactivated, the leaf symbol under the display digit will be ON or OFF.

- How the system works:
 - The unlocked door goes down.
 - TY4 triac are used to control of auto door mechanism.
 - The mechanism stops the door at 10 cm opening.
- Benefits:
 - At hot rinse step, the water is heated up to reasonable values and A class drying is provided by letting the steam flow away to air from the dishwasher.
 - Some of required heating energy for drying is saved at hot rinse step.

Factory setting for auto door open system is set to "OFF" except Eco program

Factory setting for Eco program is set to "ON".

Auto door option button is illuminated (ON) when user selects at only Eco program by each pressing program selection button.

In Eco program, Auto door must be opened in every cycle until the end user unselect the Energy save option for Eco program. That is to say, In first cycle of Eco or other cycles, Auto door system must be performed (ON) until end user deactivate Auto door system.

Due to Eco design requirements, each energized of the machine (by pressing ON/OFF) Eco program must be fixed as default, energy save option led must be ON(only valid for Eco) and the options that are chosen before will be cancelled.

For ex: when user power OFF/ON→ Eco program is fixed as default, energy save option led is ON.

Then if user press again program button, in this case machine passes to Dual pro wash, but energy save option led must become OFF.

6.15 AUTODOOR CONTROL TEST

Press "Options" button. For A4, use energy save button for this test.

Switch-on the dishwasher. Keep pressing Options button for 3".

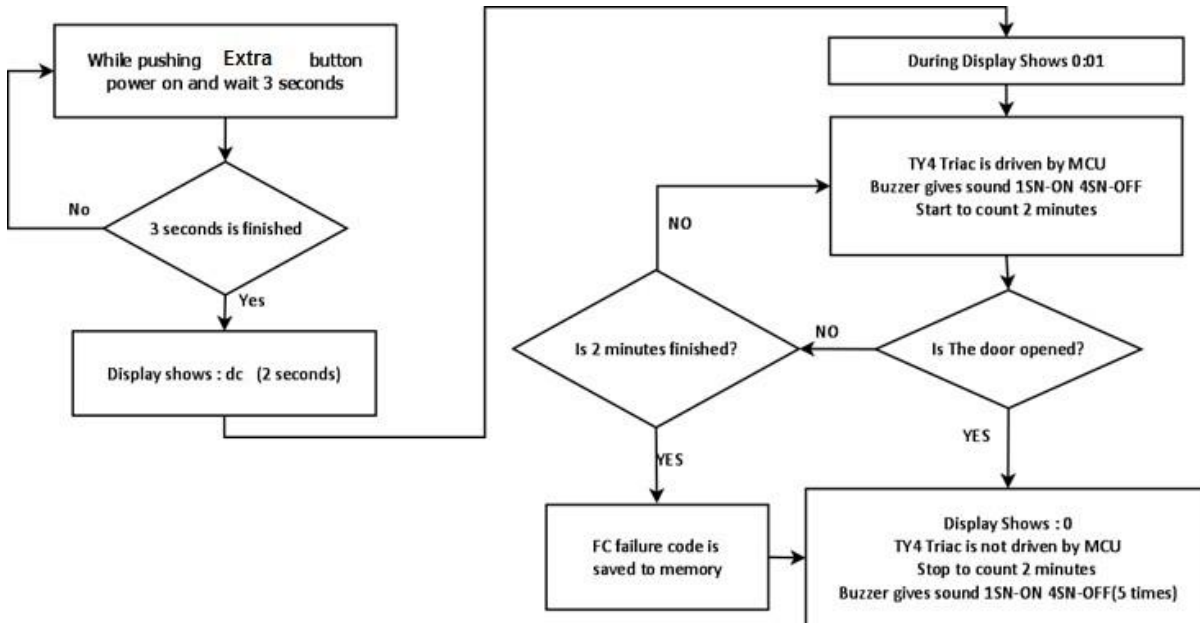

After 3", display shows "dco" (means that Door control) characters during 2 sec, then "0:01" characters appear.

- Program in the "0:01" (Last 1 minute before program finishing)
 - Start to count 2 minutes in the memory
 - TY4 triac is driven by microcontroller and door open system is energized
 - The buzzer gives sound (1"ON + 4"OFF) until auto door mechanism open the door
 - There is 1 on the display during this time.
- When Auto door mechanism open the door

- TY4 triac is not driven by microcontroller
- There is 0 on the display.
- Stop to count 2 minutes in the memory
- If Auto door is not opened in 2 minutes
 - TY4 triac is not driven by microcontroller
 - There is 0 on the display.
 - FC failure code is saved to memory

-Test can be finished by pressing On/Off button.

6.16 BLDC MOTOR CONTROL TEST

Press “Select” button. Switch-on the dishwasher. Keep pressing “Select” button for 3”.

For A4 models,press upper basket touch buttoni turn on machine and continue to press upper basket button for 3”.

Increase level by pressing upper basket touch button

Decrease level by pressing lower basket touch button.

After 3”, display shows “Pco” (means that Pump control) characters during 2 sec, then “200” characters appear and BLDC motor start performing with 2000 rpm.

Rpm values can be raised or decreased one by one.

Press “Options” button to raise RPM values from 2000 to 3400.(200,210,220,...,340)

Press “Select” button to decrease RPM values by hundred from 3400 to 2000.(340,330,320,...,200)

-Test can be finished by pressing On/Off button.

6.17 WATER SAVE CONTROL TEST

		A1 w/o disp	A1 w/disp	A2	A3	A4
Water save control				power on->options + select 6”	power on->options + select 6”	Power on -> Ext. DRY 3”

After 5", display shows "rc" (means that recovery control) characters during test. The buzzer gives **sound (1"ON + 4"OFF)** during test except "buzzer sound finishes step" in below diagram.

Pressing any button does not affect the test and any invalid buzzer sound is not heard while water save algorithm in below diagram is continuing.

At the end, buzzer gives long sound.

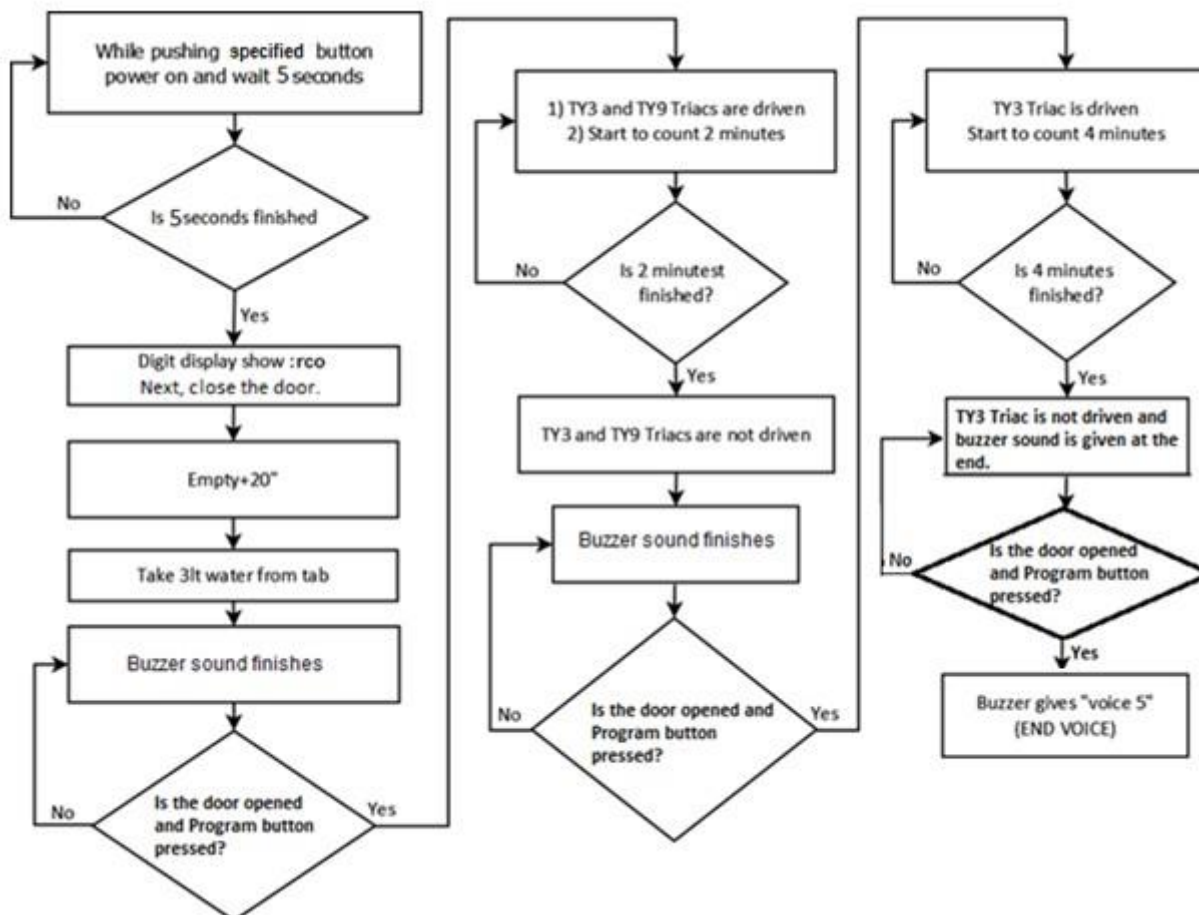

Test can be finished by pressing On/Off button.

Notes:

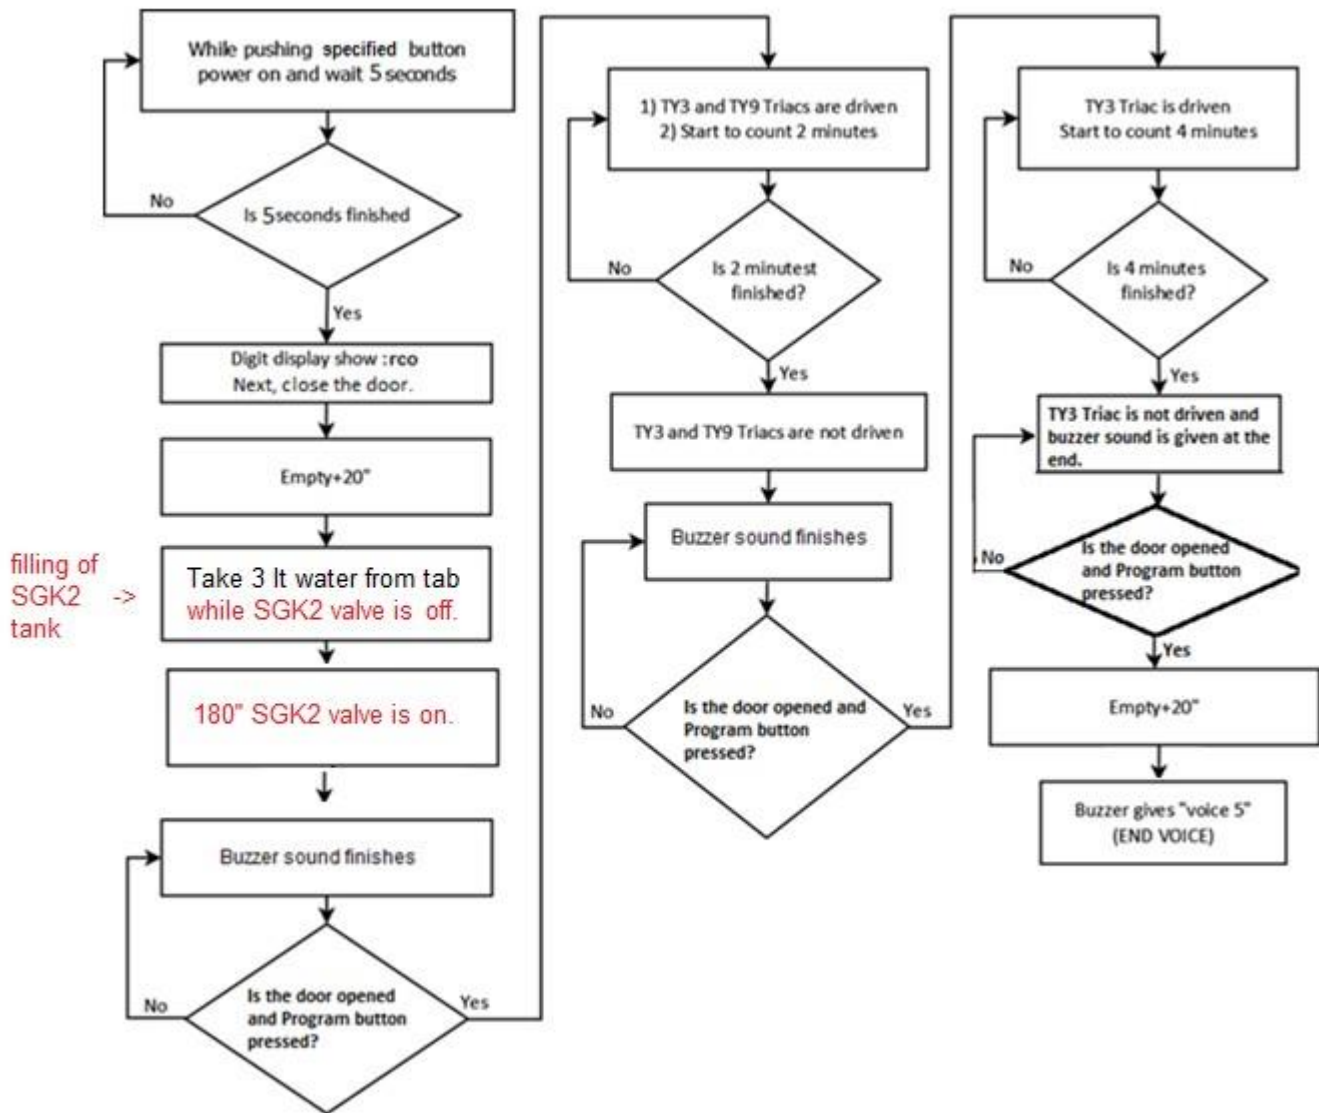

1. If a program is started after Eco/Eco5.4lt program, water inside the water save tank is drained at the beginning of the program. It is not necessary to terminate the Eco or Eco5.4lt program to execute draining on the beginning of the next program, it is sufficient to start it. Draining takes 4 minutes.
2. After water save tank is full, user must press Program button to continue the test. If Program button is not pressed, test does not continue.
3. If machine turns off/on while test is being executed, machine turns to standby position.

During the test below algorithm is applied:

For one tank;

For two tank;

6.18 VOICE CONTROL TEST (for models having Auto Door mechanism)

First energize the machine via main switch (if it is in OFF position).

Press option and select buttons for 3".

If voice controlling is done first time, at the end of 3 seconds, "S:03" is shown in the display and Buzzer gives a long sound. (level of 3) (Factory setting is set to "S:03")

User can open or close the voice level with "Program" and "S/P" buttons. The characters must be as follow;

By each pressing "Select" button,

- Display screen changes S:03 to S:00
- Level of sound is decreased
- "S:00" level that means all voices are off

By each pressing "Option" button

- Display screen changes from S:00 to S:03
- Level of sound is increased

Machine's power must be off to exit voice control mode

The last voice level that user determined before must be stored in memory.

For A4 series: Press "just left icon of the **Lower basket**" for 3" to change voice level. Increase level by pressing upper basket, decrease level by pressing lower basket.

6 SERVICE TEST

Only service can execute this procedure.

- Power OFF; press Start/Stop button.
- For all models: Power ON by pressing On/Off button and continue to press Start/Stop button at least for 6".
- When "Service test" is recognized
 - **For models w/o display:** All leds are ON. If model has sliding dispenser, all leds blink three times and service test starts.
 - **For models w/ display:** All leds are ON, SP is visualized on display and service test starts. During the first 6" of test, if a failure code is stored in memory, its codification blinks. Also at the end of the test if an error occurs its error code blinks.

During the test, SP is shown.

Step		Time	Tested Load	
0	Show code	6"	Before start, the code of last error is visualized (see below)	
1	Drain	6"	Drain pump.	
2	Fill (3l/2,5l)*	~ 1'	Flow meter; Inlet Valve;	* 3lt in A1; 2,5lt in A2.
3	Fill + Wash (0,5/1lt)**		Flow meter; Inlet Valve; Pressure Switch;	
4/□	Turb. Sensor	30"	Measure of turbidity sensor	
5	Wash	1'	Circulation pump; Regeneration Valve; detergent dispenser.	** 0,5lt in A1; 1lt in A2.
6	Wash + Heat ***	5'	Heater (PSW); NTC; diverter (position).	
7/8	Reg. Valve + Turbo Fan	1'	Regeneration Valve + Turbo Fan	
9	Water V+Drain	1'20"	Water Valve; Drain pump; Pressure switch	
10	Drain	20"	Drain pump; pressure switch.	
11	End	-	Code error or end led	*** In

service test the unsuccessful heating failure routine works with reduced time of recognize (first measure at 2'20", second measure t 4'20")

Note: For the models with 2nd water recovery tank, the service program begins with the SGK2 tank draining step (SGK2 valve is on for 180" and then drain the water). Also, during fill and fill + wash steps, 2nd SGK valve is on. After that, If the PSW is OFF position, take 3 lt more and if the PSW turns ON, at the end of service program "EE" failure is shown.

If during the service test, the door is opened, Start/Stop led blinks (for models w/ display "SP" is shown).

If during the service test, the Start/Stop button is pressed, the program corresponding on the program leds (for models w/o display) or display (for models w/ display) position starts.

To reset the service test, press On/Off button or plug out and then plug in.

Also at the end of the test, if an error does not occur, any error code is not visualized. Machine will be standby position.

Note: If user did not set water hardness level before service test, "SE" is shown at the beginning and end of service test.

6.1 SERVICE FAILURE CODES

For models w/o display (A15, A0);

Name	S_P	Wash	Dry	End	display	Notes	Error Explanation (for app)
Overflow/Leakage	-	Blink	-	Blink	F0/F1	In the normal work only leakage is visualized.	water leakage (F0 is not shown to user, shown in service test) F1 is shown to user
Drain time out	Blink	-	-	Blink	F2		unable to drain
Presence Flow meter impulses	-	-	-	Blink	F3		overfill of water
Absence Flow meter imp.	-	Blink	-	-	F4	In the normal work is not visualized.	flowmeter sensor (not shown to user, shown in service test)
Empty Level	Blink	-	-	-	F5		not enough water
Empty Level	-	-	Blink	-	FF	FF will be shown for new models (26.04.2020)	not enough water
Re-Fill time out	Blink	-	-	-	F5		not enough water
NTC ca/cc	Blink	Blink	-	-	F6		temperature sensor
Overheating	Blink	-	Blink	-	F7		overheating
Unsuccessful heating	-	Blink	Blink	-	F8	In the normal work is visualized at the end of prg	unable to heat (not shown to user, shown in service mode)
Turbidity Sensor	Blink	-	Blink	Blink	FA	In the normal work this failure is not visualized.	turbidity sensor (not shown to user, shown in service mode)
Parameter set salt incorrect	Blink	Blink	-	Blink	SE	In the normal work this failure is not visualized.	salt parameter not set (not shown to user, shown in service mode)
CK Parameters	Blink	Blink	Blink	Blink	FE	not used	-
HIGH VOLTAGE	Blink	Blink	Blink	-	HI		high voltage
LOW VOLTAGE	-	Blink	Blink	Blink	LO		low voltage
Auto Door	-	-	-	-	FC	In the normal work this failure is not visualized.	auto-door error (not shown to user, shown in service mode)
Incompatible Electronic Cards	-	-	-	-	EnA	In the normal work this failure is not visualized.	Incompatible main – display cards (not shown to user, shown in service mode)
2nd SGK valve failure	-	-	-	-	EE	In the normal work this failure is not visualized.	2nd SGK valve failure (not shown to user, shown in service mode)

For models w/ display;

Name	DISPLAY	Notes
------	---------	-------

Overflow	F0	In the normal work this failure is not visualized.
Leakage	F1	
Draining time out	F2	
Presence of Flow meter impulses	F3	
Absence of Flow meter	F4	In the normal work this failure is not visualized.
Empty Level	F5/FF	FF will be shown for new models (26.04.2020)
Re-Fill time out	F5	
NTC ca/cc	F6	
Overheating	F7	
Unsuccessful heating	F8	
Diverter opened	F9	
Turbidity Sensor	FA	In the normal work this failure is not visualized.
Parameter set salt incorrect	SE	In the normal work this failure is not visualized.
CK Parameter	FE	
High Voltage	HI	In the normal work this failure is not visualized.
Low Voltage	LO	In the normal work this failure is not visualized.
Wifi connection failure	1F	In the normal work this failure is not visualized.
Incompatible Electronic Cards	EnA	In the normal work this failure is not visualized.
2nd SGK valve failure	EE	In the normal work this failure is not visualized.

7 FAILURE ROUTINES

N°	Name	Exit of failure state	Service Call
1	Switch door open	Door closing	NO
2	Delay after door closing	7" delay before restart prg in heating step	NO
3	Overflow	Overflow signal gets off	NO
	Leakage	OFF/ON	YES
4	Draining time out	OFF/ON	YES
5	Presence of Flow meter impulses	Flow Meter signal gets off.	NO
		OFF/ON.	YES
6	Absence of Flow meter impulses	Pressure switch on Full.	NO*
		Pressure switch on Empty. OFF/ON	NO/YES
7	Level Empty	Level doesn't reach full	NO/YES
8	Re-Fill	3 Re – fill in the same washing step	NO/YES
8	NTC ca/cc	OFF/ON	YES
8	Overheating	OFF/ON	YES
10	Unsuccessful heating	OFF/ON	YES
11	Diverter opened	OFF/ON	YES
12	CK Parameters	OFF/ON	YES
13	High Voltage Failure	OFF/ON	YES
14	Low Voltage Failure	OFF/ON	YES

*Cycle could be executed with a filling time.

Failure Routine

If a failure is recognized:

- Stop all devices
- Stop program flow.
- Drain Empty + 30" with circulation pump on

If the failure requires the termination of the washing program:

- Stop all the devices.
- Start to visualize the failure code.

If the failure doesn't require the termination of the washing program:

- Stop all the devices.
- Re-Start the washing program.

If it is necessary it performs the *Re-Fill routine*

Re-Fill Routine

After a forced drain (ex: a failure routine) if the dishwasher was in wash before the drain it performs the re-fill routine:

- Inlet Valve ON + circulation pump OFF to load 3l (time out 420")
- When the first load step is finished, Inlet Valve ON + circulation pump ON to load 1l (time out 100")
- Return to the washing cycle

7.4 DESCRIPTION OF FAILURES

Opened door switch

Recognize:	if door is opened with a started program
Action	Wait
Exit	Closing door.
Service	No

Model	Start/Stop(w/o display) Delay(w/display)	Wash	Rinse	Dry	End	Display
A1	Blink	-	-	...
A2	Blink	-	-	-	-	...

Delay in re-start program

Recognize:	if door is opened and re-closed in a heating step.
Action	Wait 5" before restart program.
Exit	Closing door.
Service	No

Overflow/Leakage

Recognize:	5" with overflow pressure sensing = on.
Action	Go to Failure routine.
Exit	If overflow signal gets off until failure routine finishes (cause is overflow): washing program restarts. It re-fills water according to Re-Fill routine and it continues to wash. If overflow signal persists until failure routine (cause is leakage): OFF/ON.
Service	NO if overflow. YES if leakage

Only for leakage

Model	Start/Stop(w/o display) Delay(w/display)	Wash	Rinse	Dry	End	Display
A1 w/o display	-	Blink	-	-	Blink	... (F1)
A1 w/ display, A2	All leds blink					F1

Draining timeout

For new models (26.04.2020)	Start/Stop(w/o display) Delay(w/display)	Wash	Rinse	Dry	End	Display
A1 w/o display	-	-	-	Blink	-	...(FF)
A1 w/ display,A2	All leds blink					FF

Rarely flow meter impulses (perhaps low water pressure)

Recognize:	With rarely flow meter impulses (time out of absence of flow meter impulses doesn't expire) it doesn't reach the first quantity of required water (2,5l) within the time out (420")
Action	Go to Failure routine.
Exit	OFF/ON
Service	Not necessary if the reason is a momentary. YES in the other cases.

Model	Start/Stop(w/o display) Delay(w/display)	Wash	Rinse	Dry	End	Display
A1 w/o display	Blink	-	-	...(F5)
A1 w/ display,A2	All leds blink					F5

For new models (26.04.2020)	Start/Stop(w/o display) Delay(w/display)	Wash	Rinse	Dry	End	Display
A1 w/o display	-	-	-	Blink ...	-	...(FF)
A1 w/ display,A2	All leds blink					FF

Level Empty and rarely Flow meter impulses

Recognize:	With rarely flow meter impulses (time out of absence of flow meter impulses doesn't expire) it doesn't reach the second quantity of required water related to the washing cycle) within the time out (100")
Action	Go to Failure routine.
Exit	OFF/ON
Service	Not necessary if the reason is a momentary. YES in the other cases.

Model	Start/Stop(w/o display) Delay(w/display)	Wash	Rinse	Dry	End	Display
A1 w/o display	Blink	-	-	...(F5)
A1 w/ display,A2	All leds blink					F5

Level Empty and regular/rarely Flow meter impulses

Recognize:	With flow meter impulses (time out of absence of flow meter impulses doesn't expire) it reaches the second quantity of required water related to the washing cycle) but it doesn't reach the full level within the time out (30")
Action	Go to Failure routine.
Exit	OFF/ON
Service	Not necessary if the reason is a momentary. YES in the other cases.

Model	Start/Stop(w/o display) Delay(w/display)	Wash	Rinse	Dry	End	Display
-------	---	------	-------	-----	-----	---------

A1 w/o display	Blink	-	-	...(F5)
A1 w/ display,A2	All leds blink					F5

Re-Fill

Recognize:	During a washing step, if pressure switch goes from full level to empty level Failure routine start. Wash restarts with the Re-Fill routine (3l+1l). If pressure switch goes from full level to empty level for 3 times during the same washing step failure is recognized.
Action	Go to Failure routine.
Exit	OFF/ON
Service	Not necessary if the reason is a momentary (ex. an upside down pot). YES in other situations.

Model	Start/Stop(w/o display) Delay(w/display)	Wash	Rinse	Dry	End	Display
A1 w/o display	Blink	-	-	...(F5)
A1 w/ display,A2	All leds blink					F5

NTC open or short-circuit

Recognize:	Recognition of open or short-circuit NTC (-20°C/86°C). Test is executed during all the program flow.
Action	Go to Failure routine.
Exit	OFF/ON
Service	YES

Model	Start/Stop	Wash	Rinse	Dry	End	Display
A1 w/o display	Blink	Blink	-	-	-	...(F6)
A1 w/ display,A2	All leds blink					F6

Overheating

Recognize:	Water temperature $\geq 77^{\circ}\text{C}$. The test is done during all the cycle.
Action	Go to Failure routine.
Exit	OFF/ON
Service	YES

Model	Start/Stop(w/o display) Delay(w/display)	Wash	Rinse	Dry	End	Display
A1 w/o display	Blink	-	-	Blink	-	...(F7)
A1 w/ display,A2	All leds blink					F7

Unsuccessful heating

Recognize:	During the heating phases, after the first 420", if water temperature increases less than 2°C or if it is less than 0°. The first valid value to check is read after 120" from the beginning of the heating step. The test is executed only if the measured temperature is lower than 60°. After door opened and reclosed during heating, temperature and time value which are read before door is opened must be cleared. Also, the control routine will start from beginning of failure routine.
Action	Skip the heating step. The test is repeated in all the heating steps. If in a following step, the heating is OK the failure is cleared. The failure is shown at the end of the program.

Exit	OFF/ON
Service	YES

Model	Start/Stop	Wash	Rinse	Dry	End	Display
A1 w/o display	-	Blink	-	Blink	-	...(F8)
A1 w/ display, A2	All leds blink					F8

Note: F8 is not sensed and shown in Jetwash 14' program.

Diverter Open Circuit(only A2)

Recognize:	30" with motor of diverter valve ON and diverter sensing doesn't change
Action	Go to Failure routine.
Exit	OFF/ON
Service	YES

Model	Start/Stop	Wash	Rinse	Dry	End	Display
A2	All leds blink					F9

Turbidity (A2)

8 END TEST

End test is divided in two parts: end test 1 (functionally test) and end test 2 (heating and leakage test).

End test 1:

Vestel receives the electronic cards ready to start "end test 1". In any case, it's possible, re-start the end test 1 with a manual manoeuvre.

- Power ON and immediately press related buttons as written below for 3".
 - Press up and down buttons for models without display.
 - Press Program and Delay buttons for models with display.
 - For A4 models, press lower basket touch button.
- When "End test 1" is recognized
 - **For models w/o display:** All leds are ON and then all leds are ON(salt and rinse aid leds are ON if there is no salt and rinse aid)
 - **For models w/ display:** All leds are ON, EP is shown on display and then all leds are ON,888 is shown on display

-After end test starts, All digits and all leds should be on together at the beginning of the end test-1 (display also show 888) during first 3 seconds.

- 188 Display segments are activated after the detergent dispenser.

-During end test 1, display shows "1:EP".

- At the end of end test 1, switch OFF the dishwasher.

-To skip the End test1, press Start/Stop button for 3 sec.

Diverter failure: Stop circulation pump just after detergent dispenser activation at step 41 until the end of program if electronic card cannot detect diverter position during end test 1.

Turbidity failure: Start circulation pump just after turbidity sensor check (at step 92) for 6 sec, if electronic card realize Turbidity sensor failure during turbidity test.

If we open/close the door during end test, End test continues from the point on which we open/close the door. End test combinations keep performing.

-Salt indicator and rinse aid indicator is ON if reed sensors are short cut during end test END TEST 1 or END TEST2

-Salt indicator and rinse aid indicator is OFF if reed sensors are not short cut during end test END TEST 1 or END TEST

Note: In cases where the machine is energized, On/Off led is ON.

However, there is a special case such that if On/Off led does not exist in model codification, the led is OFF. If the led is included in the codification, On/off led is ON. After codification ended, On/Off led is ON since machine is energized.

End test 2

When the electronic card is switched on after the end test 1, end test 2 starts.

- 4" of pause
- Heating to reach 62°C with 13' of time out
- Only circulation pump is on for 10" sec
- Drain + Regeneration valve is on 20"
- End test 2 is finished.

During this phase, failure routine of unsuccessful heating and failure routine of NTC works. If the water temperature doesn't increase, at the end of 15', the drain pump will be on.

When the electronic card is switched on after end test 2, it will be in washing mode.

-During end test 2, display shows "2:EP".

At the end of end test 2, machine turns to standby position(Eco program is shown as default).

Note: During check of Turbidity and Diverter position in the End Test1, if there occurs error, electronic card will save these errors and will go to the failure routine at the beginning of END test 2 (as NTC failure recognition)

End test 3

When the electronic card is switched on after the end test 2, end test 3 starts and display shows "3:EP". During ET3, all leds are on.

- During end test 3, if user open the door, end test 3 is going on to be performed.
- During ET3, if mains power is cut and machine energized again with plug in, ET3 restarts.
- When any button is pressed including on/off button, ET3 will be end and machine will go to ready state.

A1E

A25

- For A4 models Wifi icon does not have touch sense feature; Remote icon has touch sense feature.

10 Wifi Specifications

Valid from 15.10.2020, on the wifi models;

- For the automatic ping test in production; at the first energizing, machine broadcasts wifi for 10 minutes. During ET2 wifi modul energy is cut, wifi does not broadcasting on ET2 mode. When it switches to ET3, it continues to count the 10 minutes from where it left off.
- When the machine is in End test 3, if any button is pressed, machine goes to the ready state.
- The machine broadcasts for 10 minutes after config buttons are pressed and CF is seen on the screen. After config buttons are pressed, only wifi led blinks during broadcasting.

- If the wifi setup is not completed after pressing the config buttons once on the machine and CF is seen on the screen, the wifi leds are off when the machine is turned off and on.
- If wifi is configured on the machine, the wifi led lights up continuously. When the remote is activated, the remote led lights continuously.
- If the modem connection is established within 30 seconds after the machine is turned off and on after the installation, the wifi led lights up as soon as the connection is established. If the time to connect to the modem is longer than 30 seconds, after 30 seconds, the wifi and remote leds will blink until the modem connection is established. When the machine is reconnected to the modem, the wifi led lights up continuously, the remote led does not light up.
- If the modem is disconnected while wifi is configured, the wifi and remote leds will blink until it is reconnect.
- If the remote is deactivated after configuration, the machine turns off after 15 minutes. If the remote is active, the machine does not turn off after 15 minutes, the screen is turned off and only the wifi and remote leds turn on. The machine wakes up when intervention is made on the machine or from the application.

	After End Test 3, in all turning on without pressing the config buttons	After pressing the config buttons	In off-on status after pressing Config buttons	After connection (without activating Remote)	After the remote is activated	If machine is turned off and on after connection (with or without Remote activation)	
						If modem is connected within 30 seconds after machine is turned on.	If modem is not connected within 30 seconds after machine is turned on.
Wifi Led	No	Yes, as blink for 5 min.	No	Yes, continuously	Yes, continuously	Yes, continuously after connection	After 30 seconds, it will blink until modem is connected. When modem is connected, the wifi led turns on continuously.
Remote Led	No	No	No	No	Yes, continuously	No	After 30 seconds, it will blink until modem is connected.
Wifi broadcast	Yes, for 10 min.	Yes, for 10 min.	Yes, for 10 min.	No	No	No	No

Config buttons

For A1 with digit, A2, A3 with Wi-Fi models, press blue indicated buttons shown on the below panel for 3 seconds.

For A4 with Wi-Fi models, press blue indicated buttons shown on the below panel for 3 seconds.

At the end of 3 seconds CF will be shown on the display.

Remote Control buttons

For A1

Press 2 sec. for remote control.

Wifi connection indicator

Remote Control indicator

For A2,A3

Press 2 sec. for remote control.

Remote Control indicator

Wifi connection indicator

For A4

Wifi connection indicator

Remote control button and indicator

LED BEHAVIOURS			
Mode	Wifi Led 	Remote Control Led 	Note
Not configed for the first time	OFF	OFF	Before CONFIG button combination is pressed at the first time
Wifi configuration step	BLINK	OFF	After CONFIG button combination is pressed, WIFI of machine is active, ready for connection to modem. Shows that user is in the connection step. 5 minutes after Config button combination pressed, if product does not connected to any modem, Wifi led turns OFF, and Not Configged mode is ON.
RC (remote control)active	ON	ON	product connected to modem, remote control active
RC inactive (Config completed)	ON	OFF	product connected to modem, remote control inactive
Internet lost when connected	BLINK	BLINK	After the connection is set up and RC is ON; this beaviour happens; 1)if the internet of the dishwasher is lost (If internet comes again, RC ACTIVE mode will be ON) or, 2)if the power of the machine is ON again after a power loss (If the connection is succeeded, RC INACTIVE mode is ON)

Security related Wifi controls:

- 1) If config operation is done, when the program is started, RC is automatically activated (no need to activate the RC by pressing the button on control panel)
(not valid if the program is started when the door is open)
- 2) RC becomes OFF;
 - when the door is opened
 - when the machine is turned off and on
 - if the energy of the machine is lost because of the loss of line
- 3) When the door is open;
 - RC cannot be activated

WIFI SLEEP mode:

While RC is ON;

- Machine does not turn off automatically (even in ECO MODE). The screen goes to WIFI SLEEP mode 15 minutes after the ready state or 15 minutes after the program finished.

During wifi sleep mode;

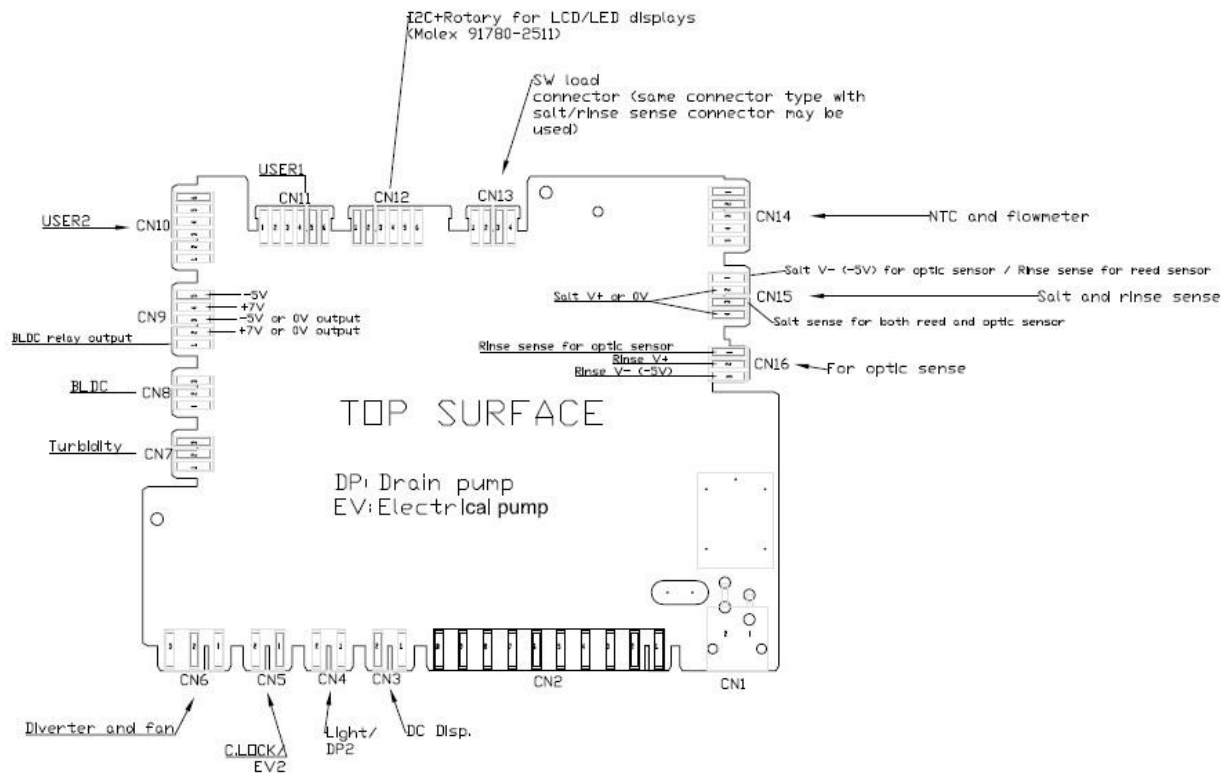

- If there is internet; only WIFI+ RC icons/leds are ON, all other leds are OFF.
- If the internet connection of the machine is lost in this mode, WIFI SLEEP mode continues, only WIFI+RC icons blink until the internet is connected again.

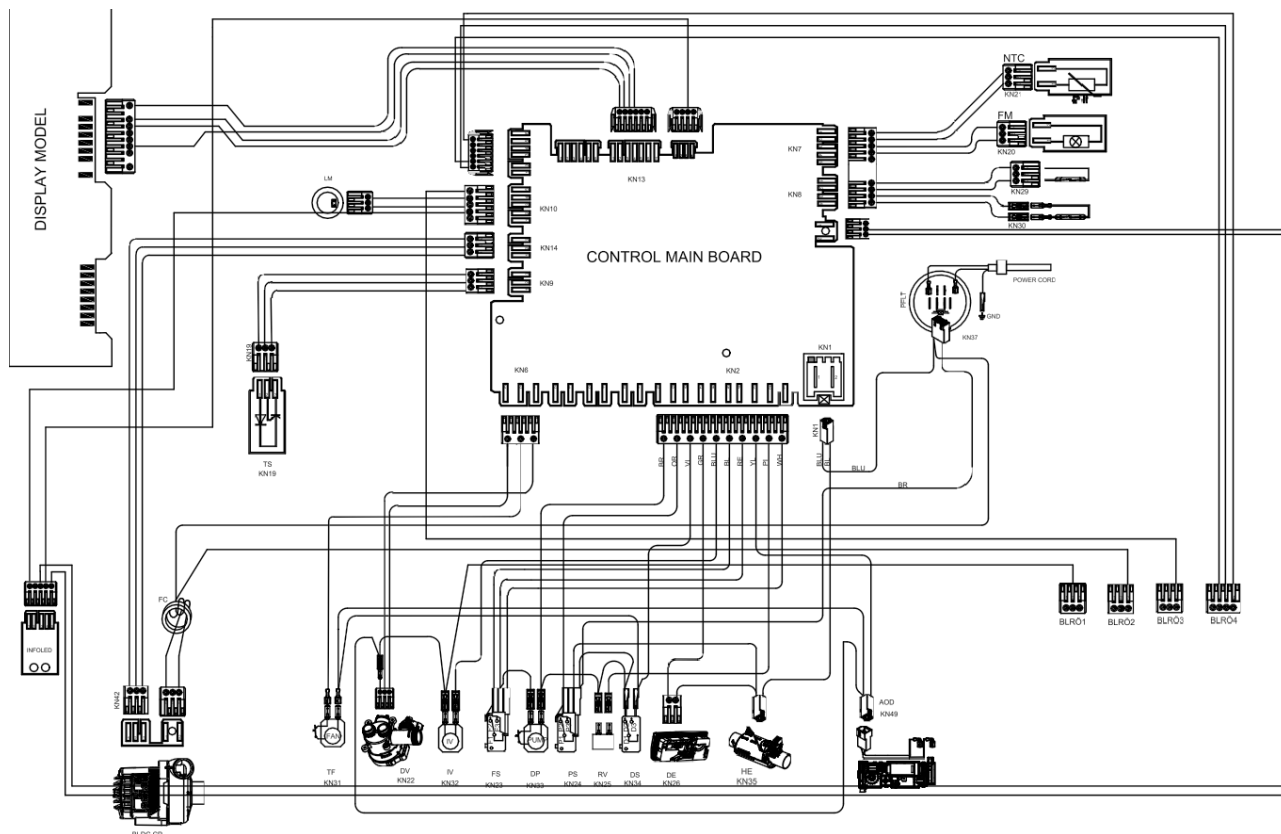

Evin Akli Mobile Application;

- 1) When Config is ON and RC is OFF, machine can be remotely monitored, which means machine can not be controlled from the application, but status of the machine can be monitored on the application.
- 2) When ionizer is activated on the machine, it can be seen on the application with a notification. The ionizer function can be cancelled on mobile application.

11 HARDWARE CONTROLS

11.1 BM05 TYPE MAINBOARD

Note: valid after 04.12.2020, for A1 models, the ionizer module (220V) will be driven with the T710 triac (in order to combine with double-winding).

In A2, A3, A4 models, the ionizer module will continue to be driven from the triac, "T711".

PIN	PIN OUT	COMPONENT
CN11.1	+7V transistor	Ionizer mini fan, dc main fan, uv led
CN11.2	+7V transistor	Ionizer led, infoled 2 led 1
CN11.3	+7V transistor	Dc lightening
CN11.4	-5V	Common ground
CN11.5	+7V	Sto motor

11.2 BM12 RELAY CARD

Valid from 1.4.2020, for A series BLDC models; In case of driving with BM05rev4 card and BM12 relay card, BM12 card data control is done from BM05/CN12.2.

CN11					CN12					
1	2	3	4	5	1	2	3	4	5	6
Vo3	Vo1	Vo2	-5	7 sabit	-5	DSDA	Dscl	Oe2	Sw2	G
				blr3	blr4.3	blr4.2(data)				blr4.4

11.3 DC FAN

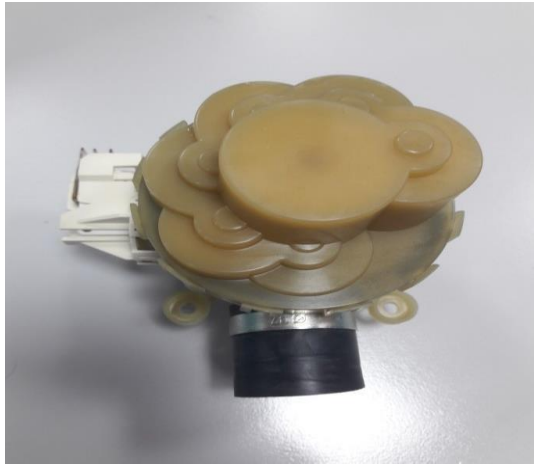

For slim models, DC fan is used and it is driven through the CN11.1 connector.

11.4 Asynchronous with Double Windings (Çift devirli asenkron)

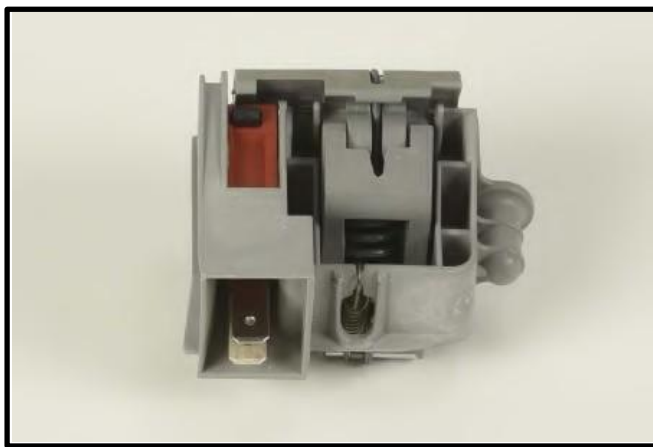

For asynchronous with double windings models; T711 is used for low RPM, T12 triac is used for high (current) RPM.

- Low speed driven from T711 triac,
- High (=current) speed is driven from the T712 triac.

ELECTRICAL COMPONENTS

AQUAZONE

DOOR LOCK

It is a mechanical lock/release system that is closing the door, supplying the connection of electrical parts in the machine and cutting off the connection.

Currency 16 (4) A

CIRCULATION PUMP

Voltage	220/240
Frequency	50HZ
Total Power	90W
Coil Isolation Class	F
Thermal Protector	150°C
Pump Outlet Pressure	300mbar
Pump Flowrate	60 lt/min

Measurement of the primary windings of the washing pump.
(118.2-135.9 Ω)

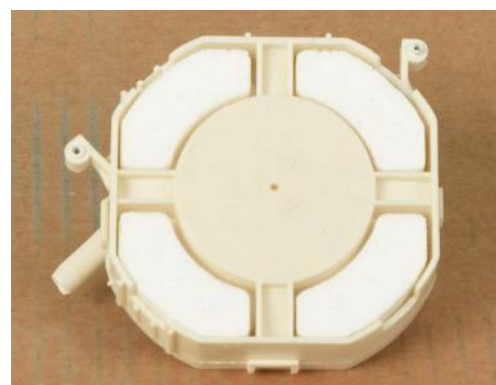

Measurement of the secondary windings of the washing pump (white cable – blue cable)(117.9-135.6 Ω)

Single direction, single phase, asynchronus and two pole.

It turns opposite clock direction.

It is assambled to the basement with rubber hangers.

FLOATER

CAPACITOR

2,5 μ F - 450 V class S2

Capacitor is permanently connected to the circulation pump coils.

DRAIN PUMP

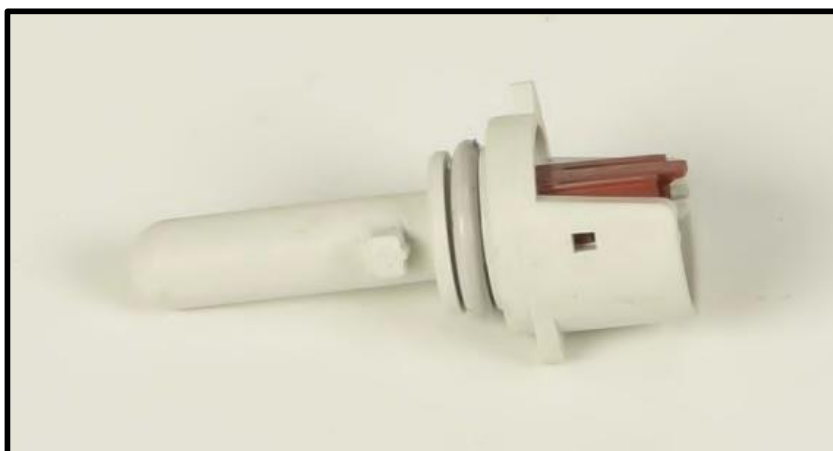

Voltage	220/240 volt
Frequency	50Hz
Flowrate	30W
Coil Resistance / Hanyu	220 Ω % \pm 7
Coil Resistance / Leili	141 Ω % \pm 7
Coil Isolation Class	F
Thermal Protector	120°C

HEATER

Voltage 220/240volt

Total power 1800W

27.6-30.6 ohm

NTC

+25°C	-	47.200	\pm	850 Ω
+30°C	-	37.500	\pm	675 Ω
+40°C	-	24.900	\pm	349 Ω
+50°C	-	17.000	\pm	170 Ω
+60°C	-	11.700	\pm	117 Ω
+70°C	-	8.280	\pm	108 Ω
+80°C	-	5.945	\pm	101 Ω

	C		T		
PRESSURE SWITCH	CN2.10 - CN2.2	0 Ω $\infty\Omega$	KN2.9 - KN2.10	0 Ω $\infty\Omega$	WATER NO WATER

PRESSURE SWITCH

Voltage 220/240 v

Frequency 50/60 Hz

16 A - 3 Pins

DIVERTER

There is diverter at A15 and A23 models. It is assembled to the heater Casing Group.

Voltage	220/240 V
Frequency	50 Hz
Power	8W
Resistance	10500 \pm %5 Ω

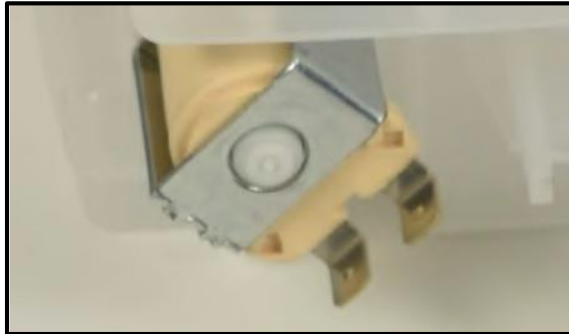

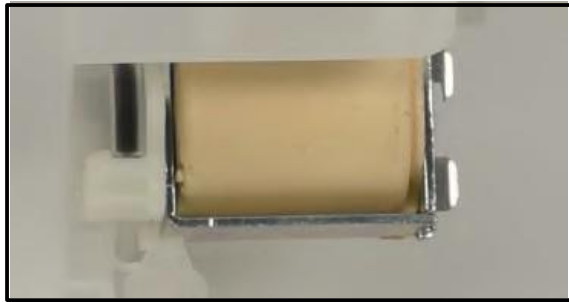

WATER INLET VALVE

Single inlet and single outlet standard single coil solenoid valve.

Voltage	220 - 240
Total Power	6W
Flowrate	2,5 \pm % 15 lt/dk
Coil Isolation Class	H
Resistance	4200 \pm %10

It is assembled to the basement and connects to the air break by hose.

REGENERATION VALVE

Voltage	220/240 V
Frequency	50/60 Hz
Total power	6 W
Resistance	$3560 \pm \% 10 \Omega^{\circ}\text{C}$

Regeneration valve is assembled on the water softener.

PARASITE FILTER

Voltage	220/240
Frequency	50/60 Hz

$0,1 \mu\text{F (X1)} + 2 \times 2,2 \mu\text{F (Y2)} + 1\text{M}\Omega$

It is used to prevent parasites from the main supply. It has been assembled to basement.

TURBO FAN MOTOR

There is a thermal protector shaded pole motor, two pole temperature is between $-40-150^{\circ}\text{C}$

There is turbo fan motor only at A models.

SALT SENSOR

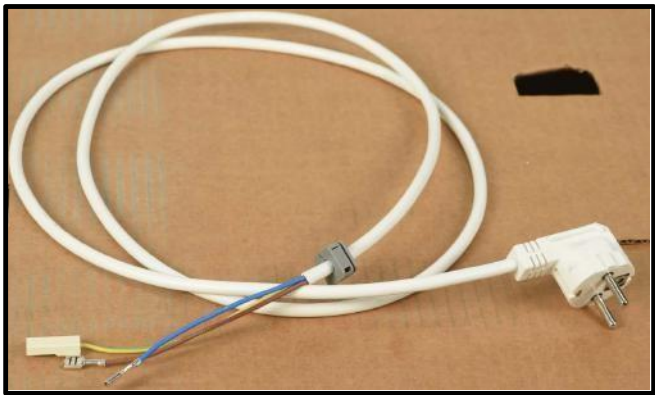

Voltage	250 V
Currency	50 mA

It is assembled to the water softener. It warns if the salt is less than requested quantity.

POWER CORD

Type	Euro 3'lü 1mm² , copper conducting
Isolation	TS 9760 HO 5VV - F
Plug	TS - IEC 60884 - 1 PVC injected
Length	1650 mm

DRAIN HOSE

Drain hose maximum height	110 cm
Drain hose minimum height	50 cm
Drain hose maximum lenght	400 cm
Total Power	15 W
Voltage	220/240 V
Frequency	50 Hz
Resistance	238.6± %5 Ω

COMPONENT VALUES MEASUREMENT

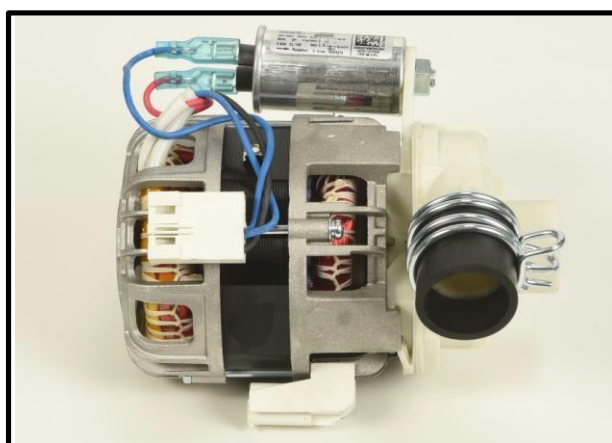

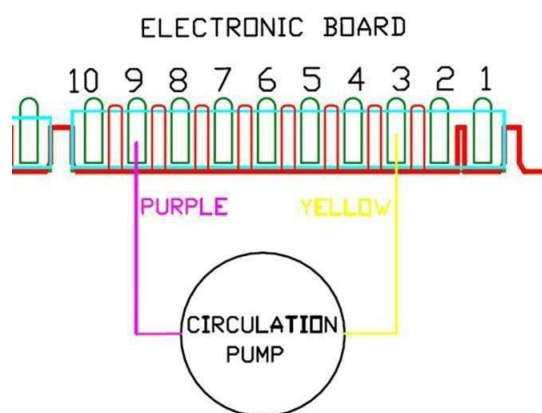

Precaution: Always remove the plug from the power socket before touching internal components.

WASHING PUMP:

From the electronic card:

You can only measure the primary winding value from the electronic card. Resistance value of the primary winding must be

	C	T	
CIRCULATION PUMP	CN2.3 - CN2.9	KN2.3 - KN 2.8	Primary winding Secondary winding (from the component)

Above sketch show the connectors of the washing pump on the electronic card. Probes of the tester should be applied on to the related connectors.

From the component:

Measurement of the primary windings of the washing pump.(118.2-135.9 Ω)

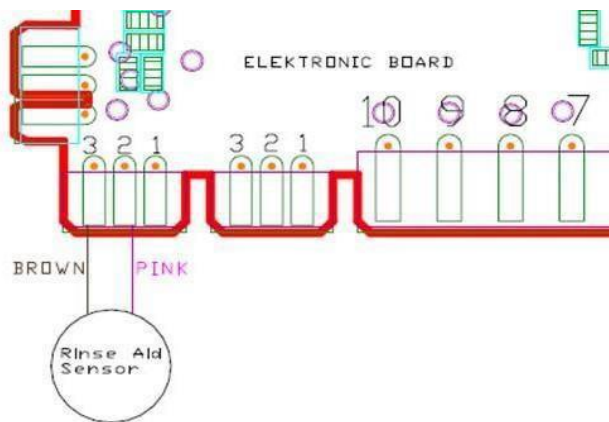

Measurement of the secondary windings of the washing pump (white cable – blue cable)
(117.9-135.6 Ω)

Probes of the tester should be applied on to the related connectors as shown on the pictures.

RINSE AID SENSOR

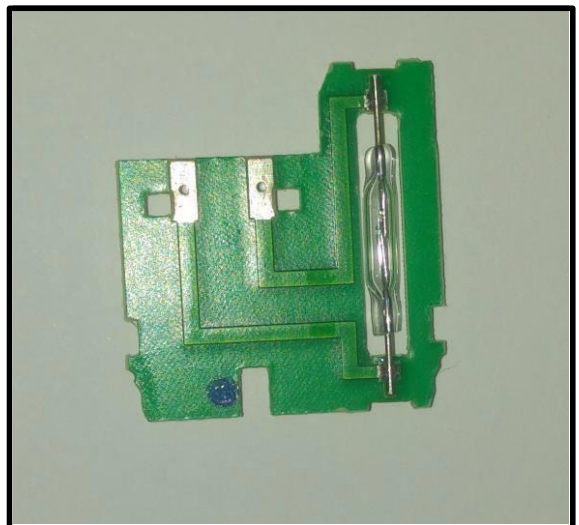

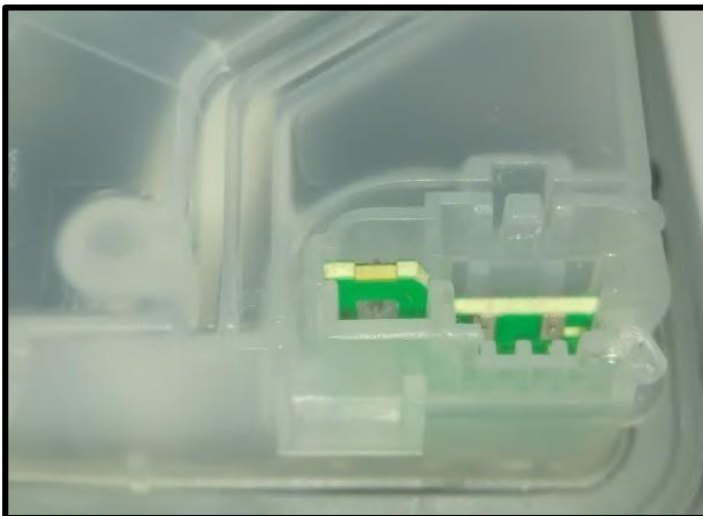

From the electronical card:

		C	T	
RINSE AID SENSOR	CN 5.3 - CN 5.2	0 Ω NO RINSE AID $\infty \Omega$ THERE IS RINSE AID	0 Ω NO RINSE AID $\infty \Omega$ THERE IS RINSE AID	Rinse aid off Rinse aid on

Above sketch shows the connectors of the rinse aid sensor on the electronic card.

From the component:

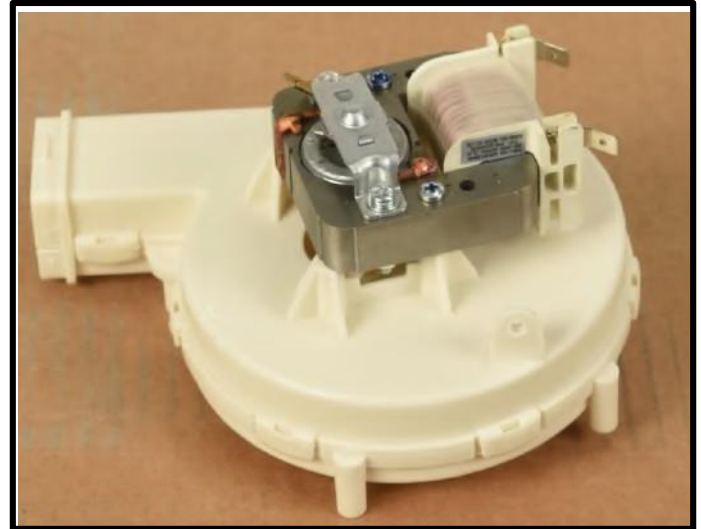

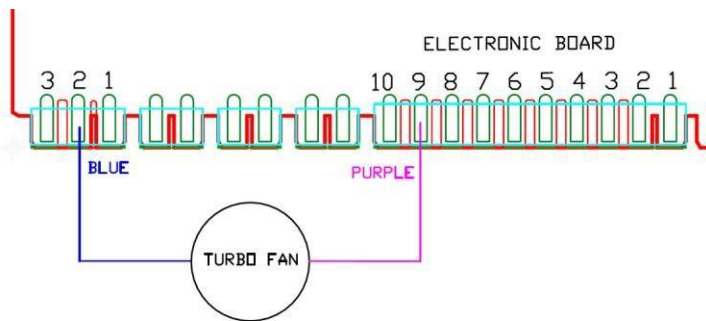

Probes of the tester should be applied on to the relatde connectors as shown on the pictures.

FAN MOTOR

From the electronical card:

	C	T
FANMOTOR	CN 6.2 - CN 2.9	KN 6.2 - KN 2.8

Above sketch shows the connectors of the fan motor on the electronic card.

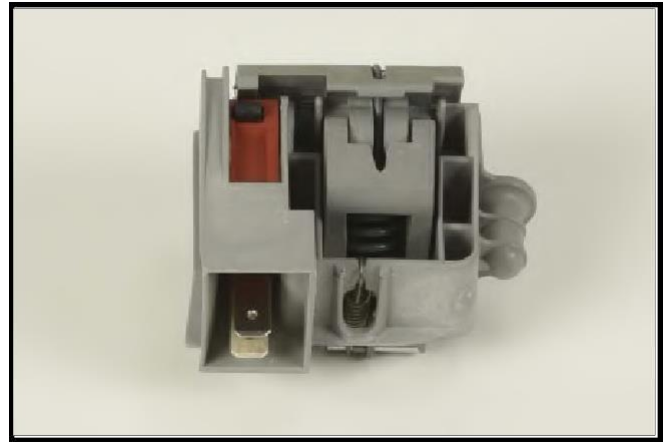

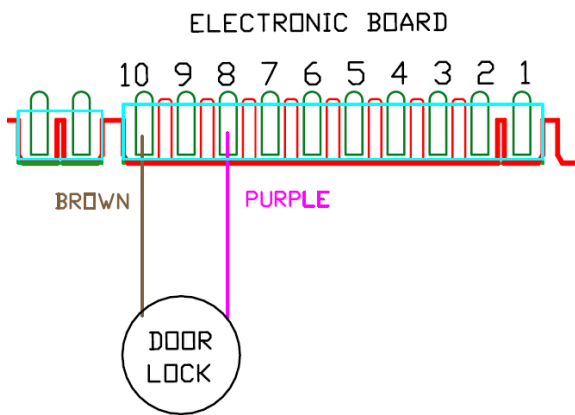

From the component:

Turbo fan resistance value: $265 \pm 10\% \Omega$ (The resistance of the turbo fan is measured with the resistor switch).

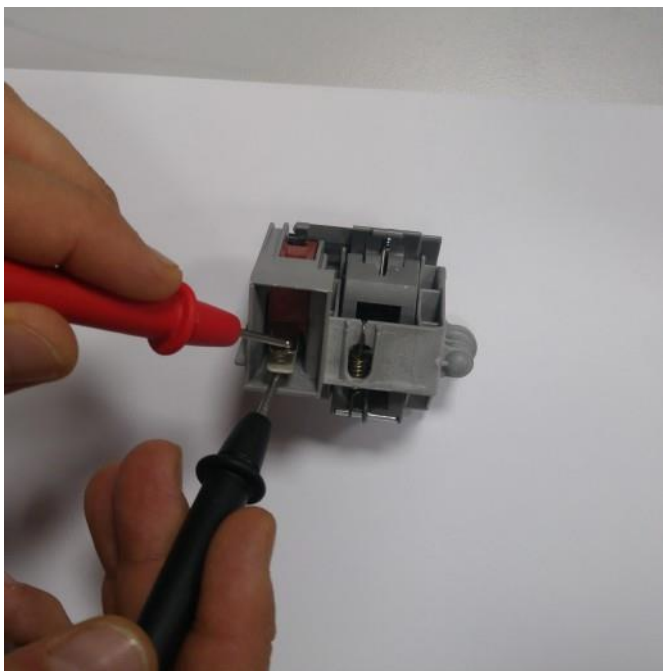

DOOR SWITCH

From the electronical card:

Above sketch show the connectors of the door switch on the electronical card.

From the component:

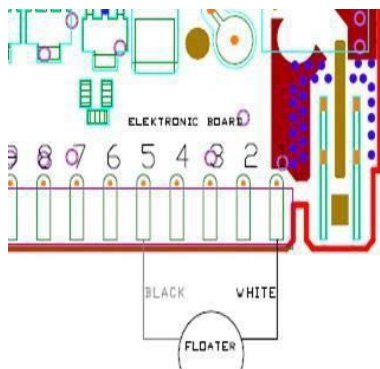

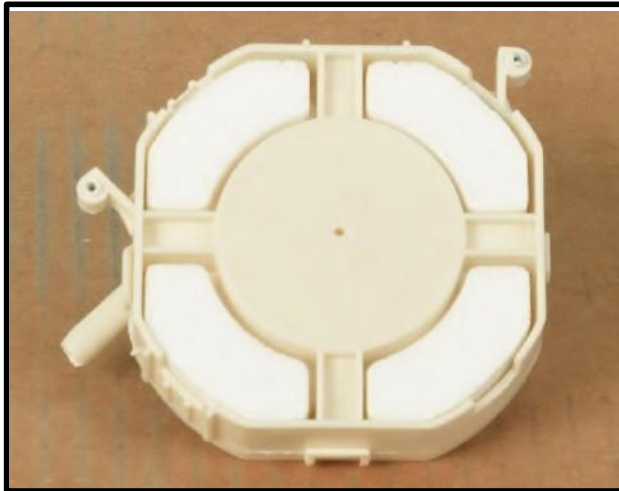

Probes of the tester should be applied on to the related connectors as shown on the pictures.

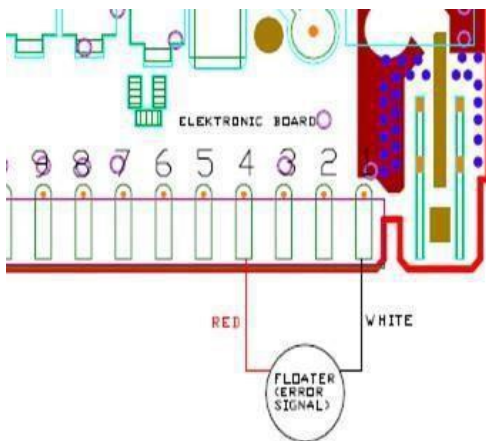

FLOATER

From the electronical card:

	C		T		
FLOATER(MICROSWITCH)	CN2.1 - CN 2.5 CN2.1 - CN 2.4	0 Ω $\infty \Omega$	KN2.5 - KN 2.10 KN2.4 - KN 2.5	0 Ω $\infty \Omega$	Microswitch is inactive (no water) microswitch is active (there is water)

Position 1 : Yo can check the floater by controlling the specified value intervals.

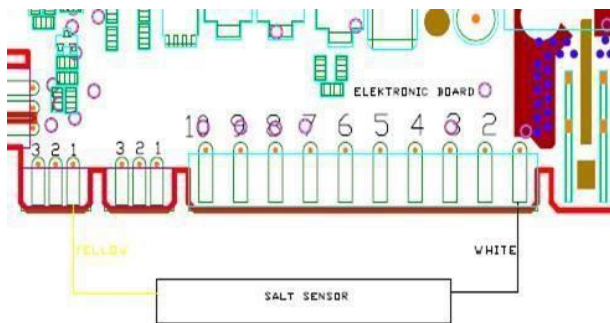

Position 2 : If failure code is occured related with the floater within control the above values: You can figure out whether leakage occurs or not.

SALT SENSOR

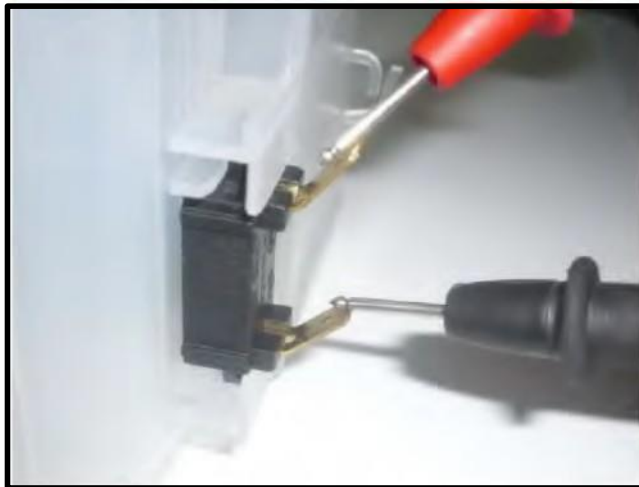

From the electronic card:

		C		T	
SALTSensor	CN5.1- CN5.2	0 Ω NO SALT $\infty \Omega$ THERE IS SALT	KN50.10- KN50.11	0 Ω NO SALT $\infty \Omega$ THERE IS SALT	Measure just on the electronic

Sketch above show the connectors of the salt sensor on the electronic card. Probes of the tester should be applied on the related connectors.

From the component:

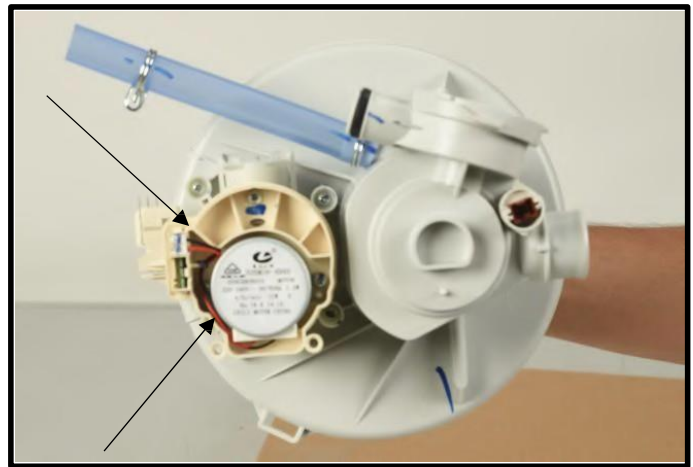

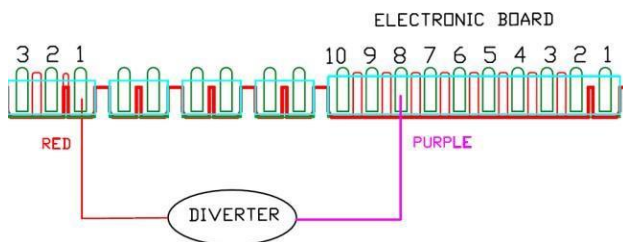

salt sensor can also be measured from the water softener when the salt sensor is assembled on the water softener.

Probes of the tester should be applied on to the related connectors as shown on the pictures.

DIVERTER

From the electrical Card:

	C	T
DIVERTER	CN 6.1 - CN 2.9 $10500 \pm \%7 \Omega$	KN 6.1 - KN 2.8 $10500 \pm \%7 \Omega$

Sketch above show the connectors of the diverter on the electrical card. Probes of the tester should be applied on to the related connectors.

From the component:

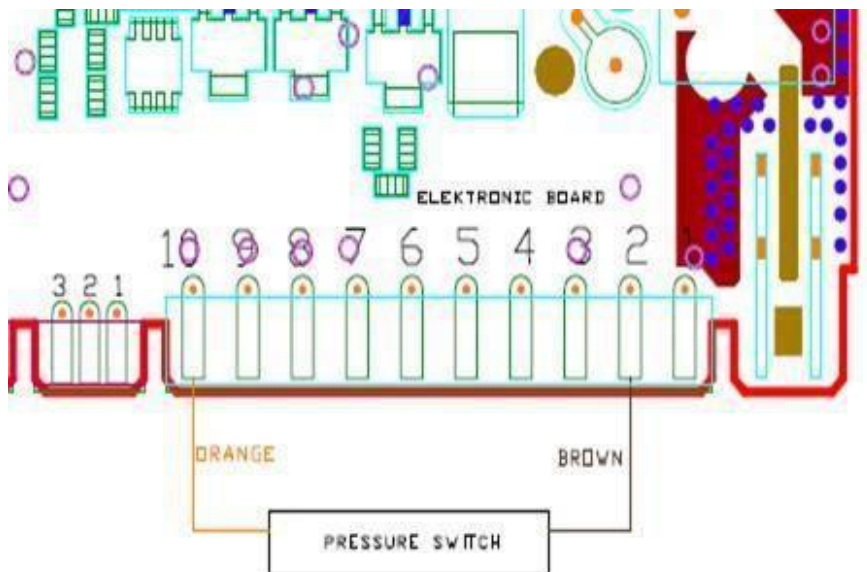

Probes of the tester should be applied on to the related connectors as shown on the pictures.

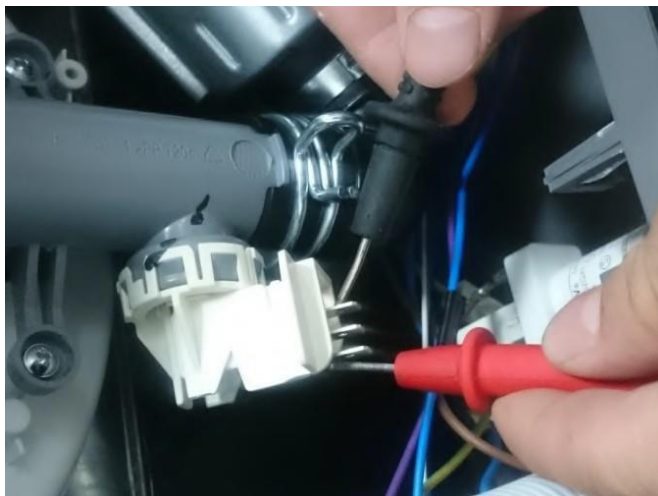

PRESSURE SWITCH

From the electronical card:

	C		T		
PRESSURE SWITCH	CN2.10- CN2.2	0 Ω $\infty \Omega$	KN2.9- KN2.10	0 Ω $\infty \Omega$	Full fill water no water

From the component:

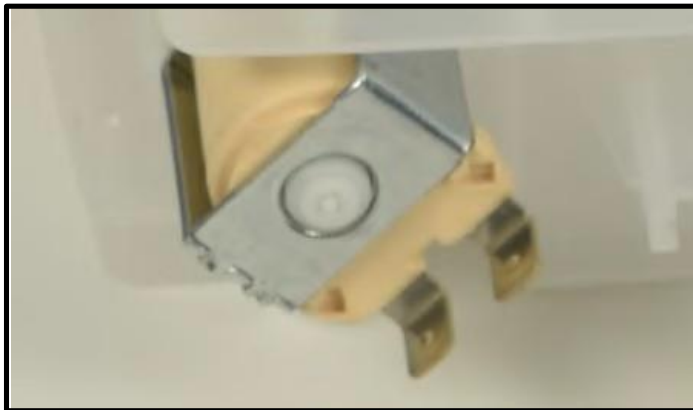

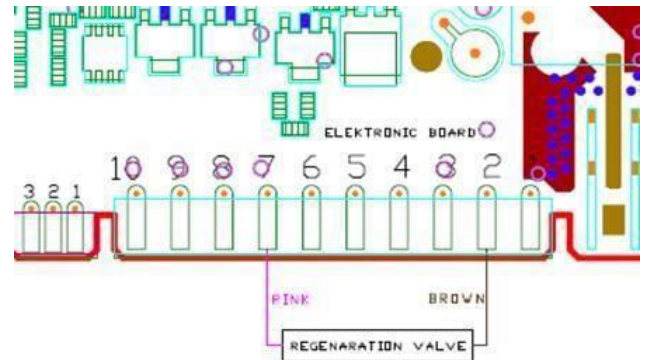

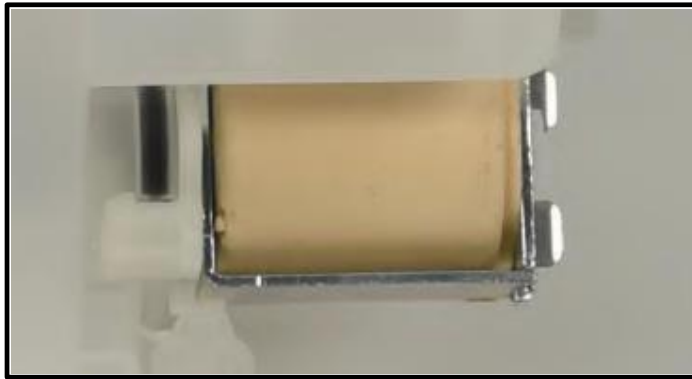

Probes of the tester should be applied on to the related connectors as shown in the picture above.

REGENERATIONVALVE

From the electronical Card:

	C	T
REGENERATION VALVE	CN2.2- CN2.7 3560 $\Omega \pm \%10(25^{\circ}\text{C})$	KN2.2- KN2.10 3560 $\Omega \pm \%10(25^{\circ}\text{C})$

Above sketch show the connectors of the regeneration valve on the electronic card.
Probes of the tester should be applied on to the related connectors.

From the component:

HEATER

It can't be measured from the electronical card.

From the component:

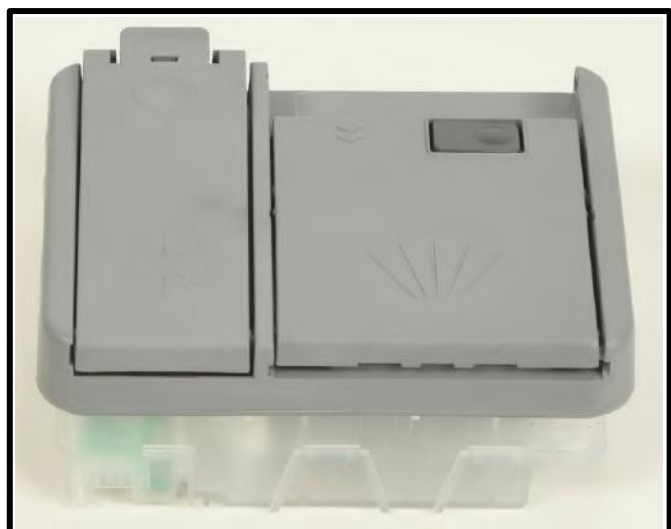

DETERGENT DISPENSER

It can't be measured from the electronical card:

	C	T
DETERGENT DISPENSER	2300Ω ±%10 (25 C°)	2300Ω ±%10 (25 C°)

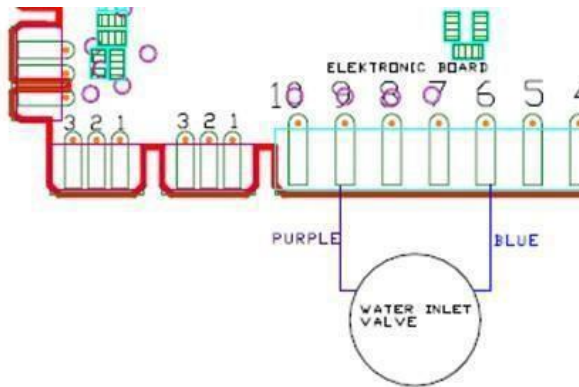

From the component:

WATER INLET VALVE

From the electronical Card:

	C	T
WATERINLET VALVE	CN2.6 - CN2.9 $4200\ \Omega \pm \%10\ (20^{\circ}\text{C})$	KN2.6 - KN2.8 $4200\ \Omega \pm \%10\ (20^{\circ}\text{C})$

Above sketch show the connectors of the water inlet valve on the electronical card. Probes of the tester should be applies on to the related connectors.

From the component:

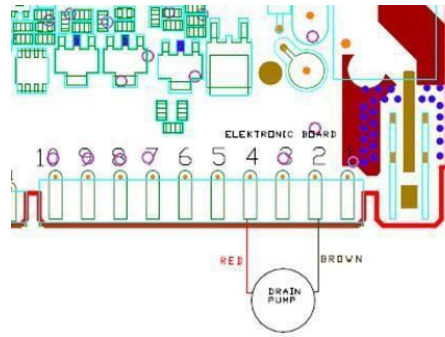

Probes of the tester should be applied on to the related connectors as shown on the pictures.

DRAIN PUMP

From the electronical Card:

	C		T
DRAIN PUMP / HANYU	CN2.2 - CN2.4	$220 \Omega \pm 10$	KN2.4 - KN2.
DRAIN PUMP / LEILI	CN2.2 - CN2.4	$141 \Omega \pm 10$	KN2.4 - KN2.

Above sketch show the connectors of the drain pump on the electronic card. Probes of the tester should be applied on to the related connectors.

From the component:

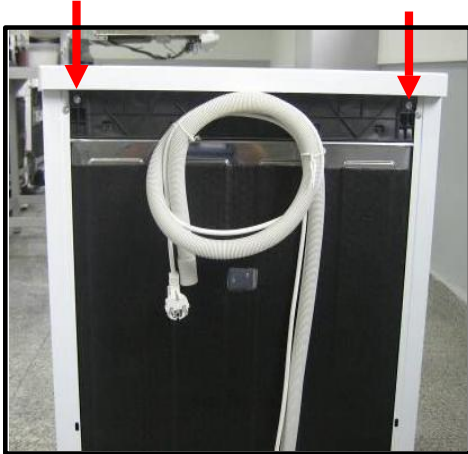

Probes of the tester should be applied on the related connectors as shown on the pictures.

DISASSEMBLY

CAUTION!: REMOVE ELECTRIC PLUG FROM THE SOCKET DURING THE DISASSEMBLY

Top Plate

- a) Remove two screws that fix the top plate at the back.
- b) Push the top-plate back and pull it up.

Plastic Kick Plate

- a) Remove two screws fixing plastic kick plate.

- b) Remove the plastic kick plate as it is shown in the picture.

INTERNAL FEEDING TUBES AND SPRAY ARMS REMOVAL

1) Unscrew the feed channel tabs with the help of a screwdriver

2) To assemble, manually narrow the feed channel replacement and insert it into the tabs

3) Pull out the top spray channel by turning it clockwise

4) Turn it counterclockwise to reinstall it

5) To remove the lower spray arm, kindly pull it up

The components that are inside the tub course, micro and metal filters

- a) Open the door.
- b) Remove lower basket
- c) To remove microfilter group rotate them in the direction of counter clockwise and pull them up as it is shown in the picture

- d) To remove microfilter group (course filter and micro filter) pull them as it is shown in the picture.

- e) To remove the metal filter pull it up as it shown in the picture.

Draining hose

- a) Remove the hose connection plastic.
- b) Remove lower cover.
- c) Remove the clamp that fixes draining hose to the pump
- d) Remove draining hose

Lower basket

- a) Open machine's door.
- b) Pull the basket to yourself.

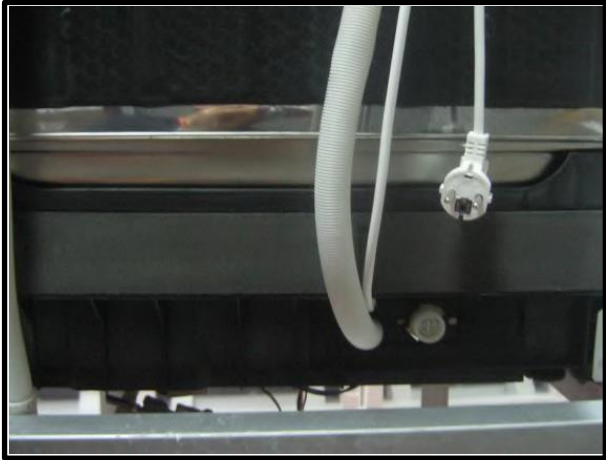

Upper basket

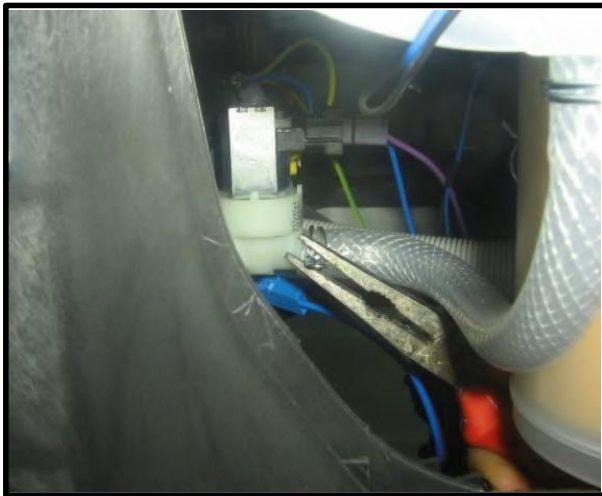

- a) Open upper basket rail lock front.
- b) Pull the basket to yourself and remove it.

Water Inlet valve

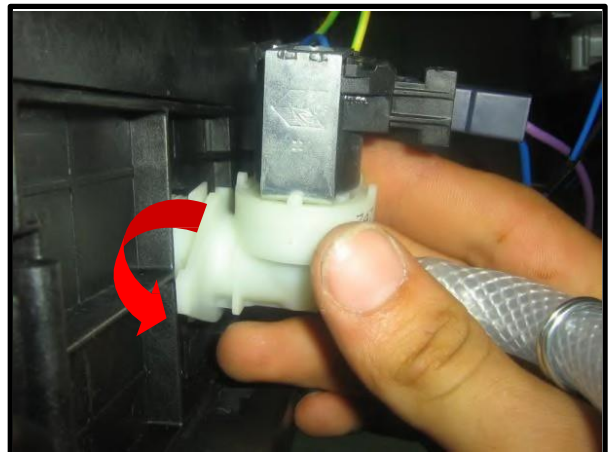

a) Remove lower cover.

b) Remove the wire that is connected to the water inlet valve.

c) Remove the clamp that connects water inlet valve and air-break as it is shown in the picture

To remove water inlet valve pull it back as it is shown in the direction of picture then release water inlet valve from the pins that is connecte to and rotate it in the direction of counterclockwise.

TURBO FAN REMOVAL INSTRUCTIONS

1) Remove top tray

3) Disconnect the condensate unit from the turbo fan.

2) Remove the side panel rear and front screws

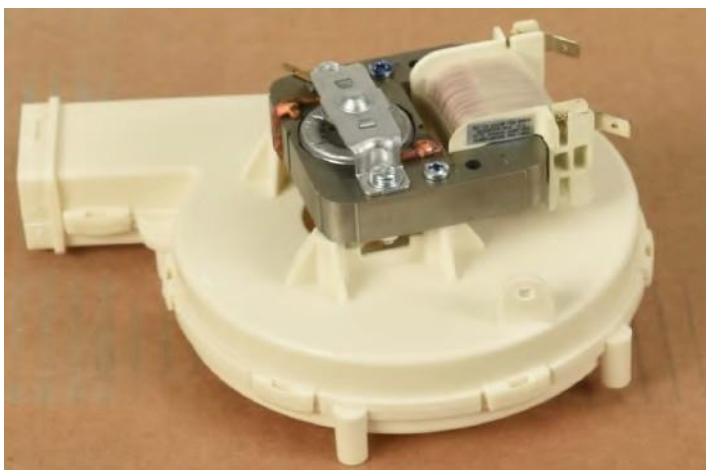

side panel rear screw

4) Remove the turbo fan screws

turbo fan screws

5) Disconnect turbo fan cables

6) Remove the turbo fan from its replacement + to reassemble, Before connect the cables, Install the screws, install the condensate unit

5) Disconnect ntc cables

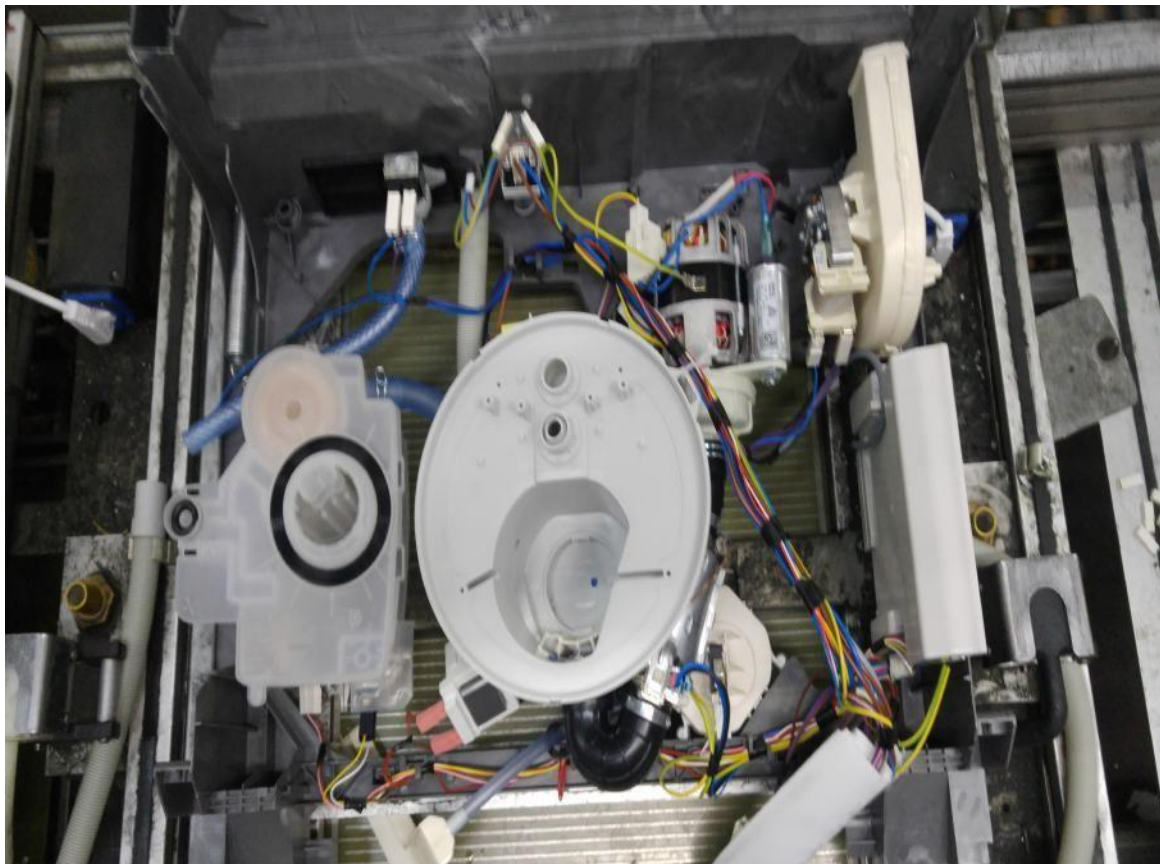

NTC

6) Disconnect heater hose

7) Unscrew eco or diverter part(it is changeable) screws

8) Then get the sump

To assemble, connect the cables and screws in same way.

SUMP GROUP REMOVAL INSTRUCTIONS

1) Remove 2 screws on top

sump screws

2) Remove the drain pump

drain pump

3) Remove the drain hose

drain hose

4) Remove the blue hose from the water softener to the pool group

blue hose

HEATER REMOVAL INSTRUCTIONS

1) Remove 2 clamps

2) Disconnect cable connections and get the heater

3) To assemble, the cables are connected first and the screws are attached.

Floater

a) Remove lower cover.

b) Remove two screws that fix floater as it is shown in the picture.

c) Remove the two floater hoses.

d) Remove the wire that is connected to the floater.

Water softener

a) To remove salt cup cover, rotate it in the direction of counterclockwise

b) To remove salt cup nut, rotate it in the direction of counterclockwise.

c) Remove left side panel.

d) Derach the connections which are between water softener and air-break.

e) Remove lower cover.

f) Remove the hose that is between sump and salt camp.

Parasite filter

a) Remove lower cover.

b) Remove one screw fixing parasite filter.

c) Remove wires.

d) Push parasite filter and remove it.

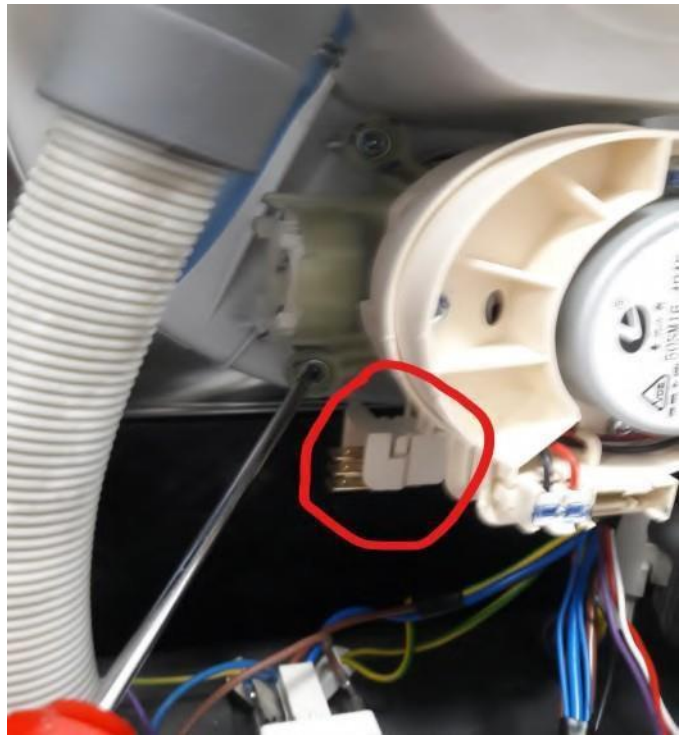

DIVERTER REMOVAL INSTRUCTIONS

1) Disconnect the diverter cables

diverter cables

2) Disconnect pressure switch cables

pressure switch

3) Disconnect turbidity sensor cables(if the machine has)

4) Unscrew the diverter screws

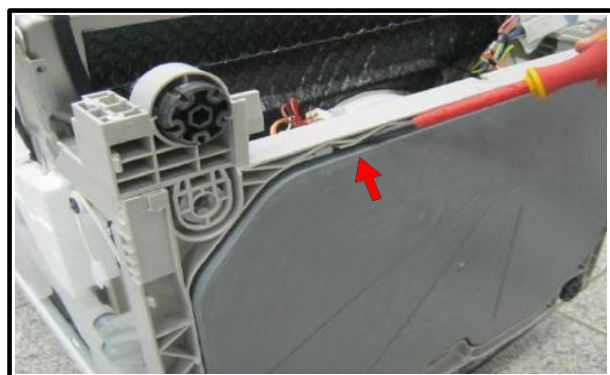

5) Pull the clamps with pliers (**Diverter clamp is next to the circulation pump's clamp. you can see in the circulation pump removal instruction page).**

Access the components from the lower cover

a) Lay the appliance on the rear panel.

b) Remove lower cover from the places that are shown in the picture.

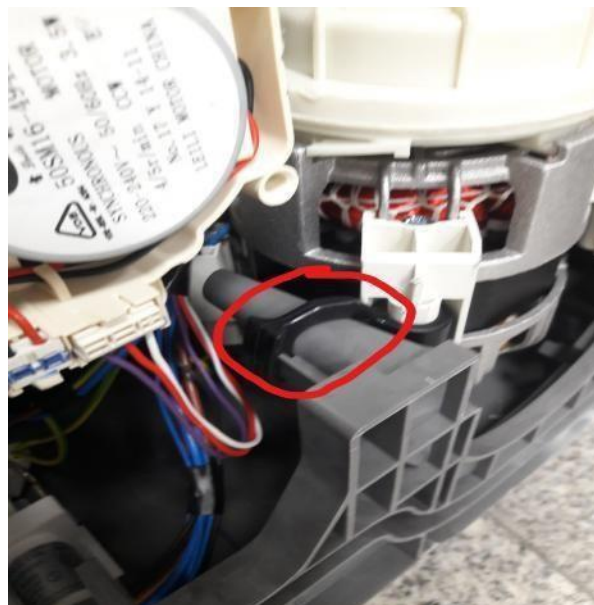

CIRCULATION PUMP REMOVAL INSTRUCTIONS

1) There are 2 clamps.

3) remove the straps from both sides

2) Push the 2 clamps upwards.

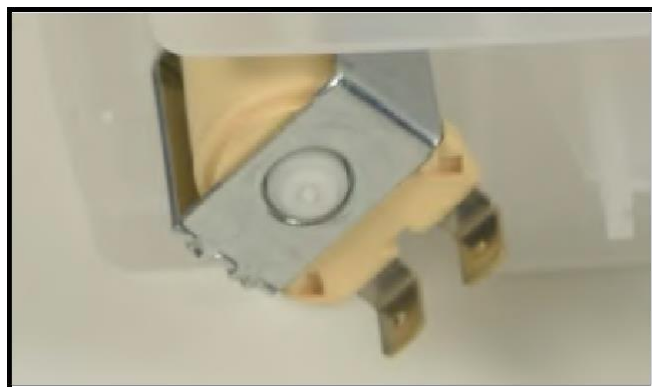

pushing the clamps upwards

To access the components from in Front of the Machine

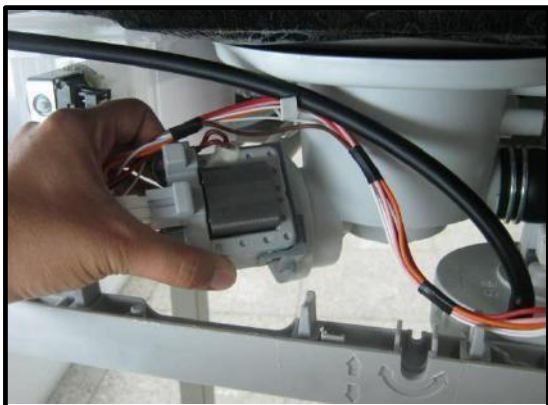

- a) Remove plastic kick plate iron sheet and basement front cover

Regeneration valve

- a) Remove plastic kick plate and kick plate iron sheet.
- b) Remove the wires
- c) To remove regeneration Value rotate counterclockwise and pull it as it is shown in the picture.

Drain pump

- a) Remove plastic kick plate and kick plate iron sheet
- b) Remove the wires.
- c) To remove the drain pump that fixes to the sump, rotate it in the direction of counterclockwise and pull.

Power cord

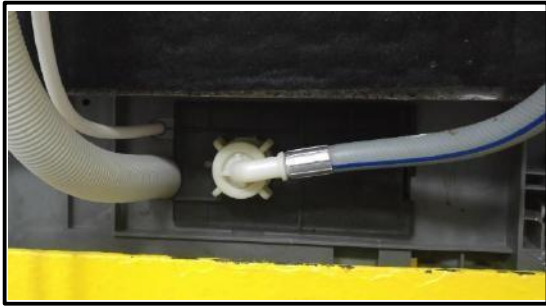

- a) Remove hose connection plastic.

- b) Remove the lower cover.
- c) Remove the wires that is between power cord and parasite filter.
- d) Remove the power cord.

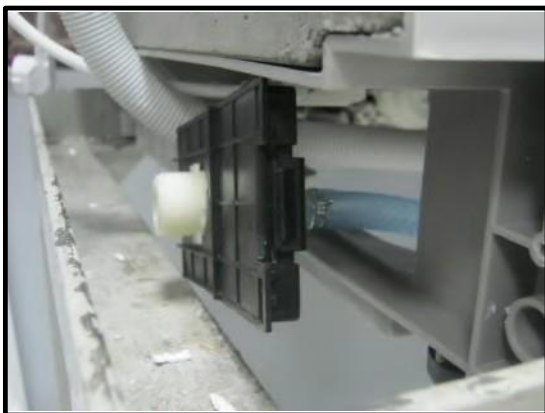

Hose connection plastic

a) Remove left side panel.

b) By using flat tip screwdriver remove hose connection plastic's hinge from the basement as it shown in the picture

c) Push the hose connection plastic.

Warning: If you do not obey instructions while disassembly of the hose connection plastic it can be broken.

Air - break

a) Remove the left side panel of the machine.

b) Open machine's door

c) Rotate counterclockwise air-break nut and remove it.

d) Remove air-break's connections with salt cap as it is shown in the picture. (be careful about plastic hinges)

Door Inside

- a) Remove side panels.
- b) Remove Hinge Spring.

Door spring

- c) Pull the door inside up as It is shown in the picture.
- d) Remove two screws that fix hinge movement sheet iron to the door inside.

KNOB REMOVAL INSTRUCTIONS

- 1) Remove control panel,
- 2) Remove the pcb box,
- 3) Remove the plastic tabs around the knob by flexing them.

DISPANSER REMOVAL INSTRUCTIONS

1) Remove front panel

2) Disconnect the dispenser cable harness

Dispanser cables

4) Then the dispenser will drop in

dispanser is free

3) Remove the metal tabs on the top, bottom and sides to disengage the dispenser.

metal tabs on the top

6)

5) To assemble, tighten the metal tabs with a pliers

After applying silicone oil or liquid soap to dispenser, press down and engage dispenser.

pressing to the dispanser down

DOOR LOCK REMOVAL INSTRUCTIONS

1) Remove control panel screws

2) Disconnect cable connections with door lock

3) Remove two door lock screws

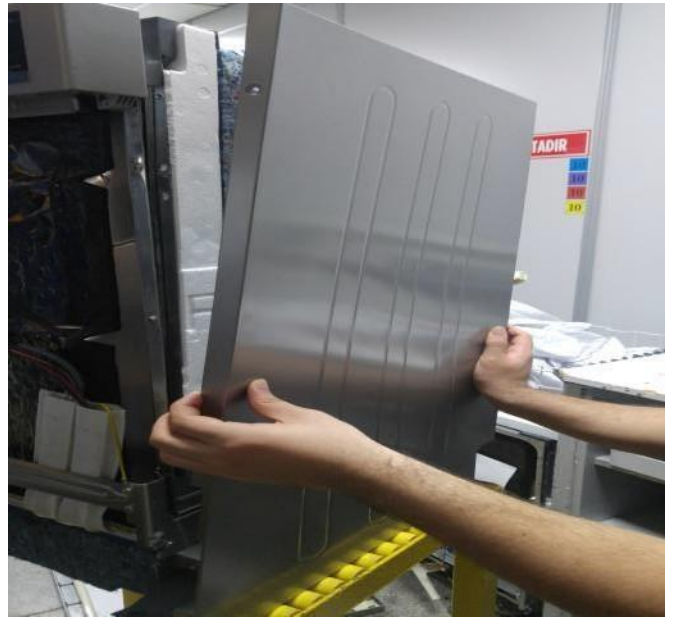

ELECTRONIC CARD REMOVAL INSTRUCTIONS

1) Remove top tray

3) Remove side panel

3) Remove side panel support styrofoam

4) Pull up the pcb box

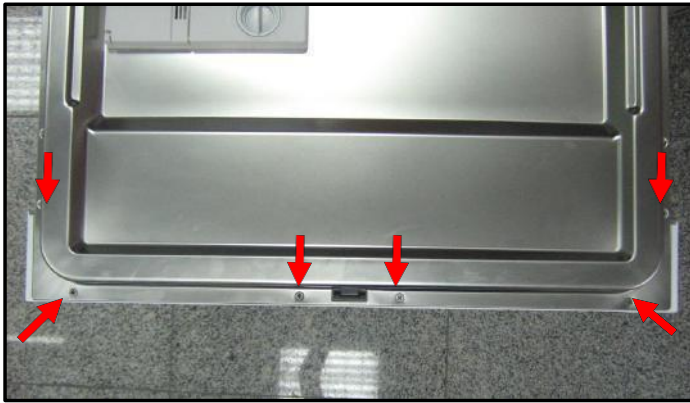

5) Disconnect cable connections from cable harness

6) Remove the tabs and take the electronic card

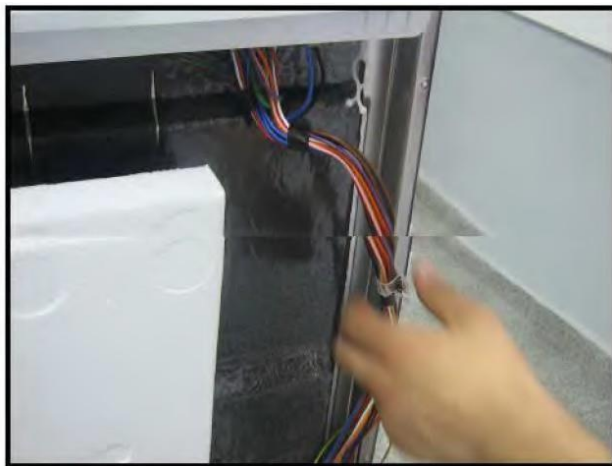

7) To assemble, reinsert the pcb box into the tabs.

Control Panel

- a) Remove 6 screws that fix control panel to the door inside sheet iron.
- b) Remove the control panel group carefully as shown in the picture

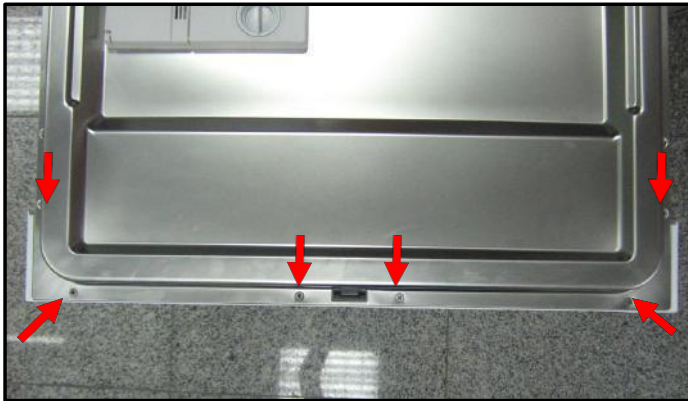

- c) Remove the cable connection plastic which fix cable harness to the control panel as shown in the picture.
- d) Remove the wires that are connected to control panel group.

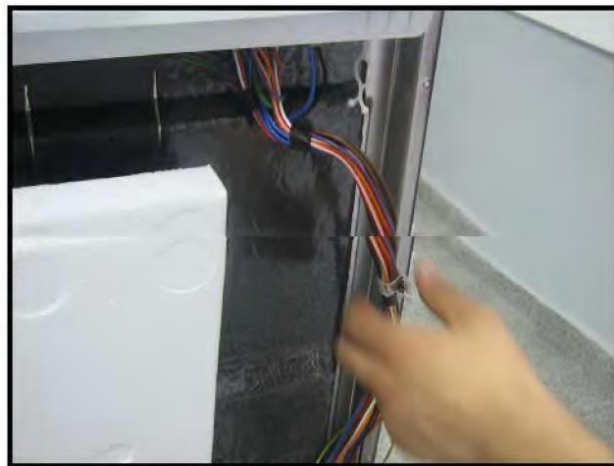

Control Panel

- a) Remove 6 screws that fix control panel to the door inside sheet iron.
- b) Remove the control panel group carefully as shown in the picture

- c) Remove the cable connection plastic which fix cable harness to the control panel as shown in the picture.
- d) Remove the wires that are connected to control panel group.

Kick Plate Sheet Iron

- a) Remove top plate, plastic kick plate and side panels.
- b) Remove the screws (4 screws) that fix the kick plate sheet iron.
- c) Pull it down as shown in the picture.

- To remove the side panel, remove the upper plastic hinge and then the above one and pull it up.

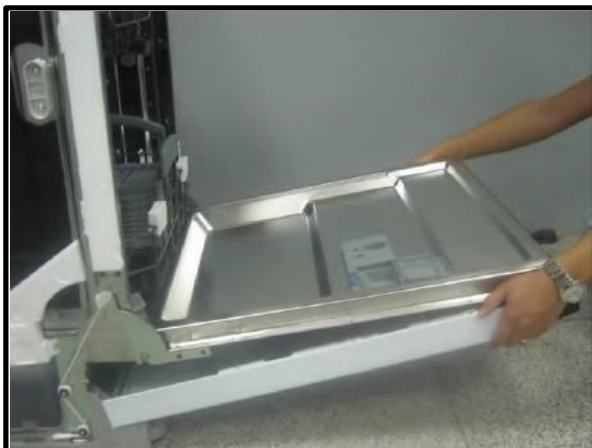

Front Panel

a) Remove the screws as it shown in the picture.

b) Pull down the front panel after removing the screws.

Side panels removal instructions

1) Remove top table screws

Top Tray screws

2) Remove the side panel rear screws

Side panel rear screws

3) Remove the kick plate plastic after removing the front panel

Plastic kick plate screw

4) Remove the side panel front screws

5) remove the side panel rear tabs

6) Remove the side panel front tabs

INNER LIGHT SOURCE REMOVAL INSTRUCTIONS

1) Remove top tray

2) Remove side panel

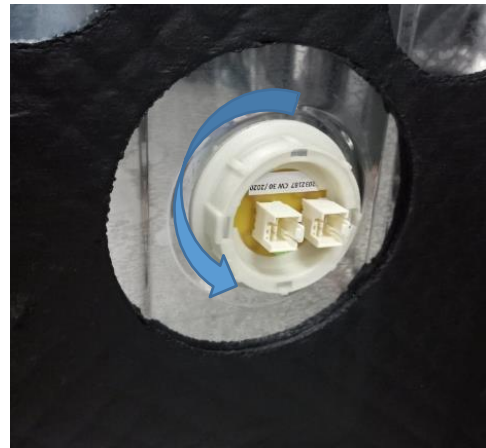

3) Remove side panel support styrofoam

4) Remove the cables

Note: This visual is representative sample

5) Rotate counterclockwise nut and remove it.

Note: This visual is representative sample.

VESTEL Dishwasher Factory	DISASSEMBLY AND ASSEMBLY INSTRUCTIONS OF AL FOIL APPLIED ON A SERIES PANELS	DOCUMENT NO:

DISASSEMBLY AND ASSEMBLY OF AL FOIL TAPE APPLIED TO THE HANDLE AREA ON A SERIES ANGEL, CARYA AND DAISY CONTROL PANELS

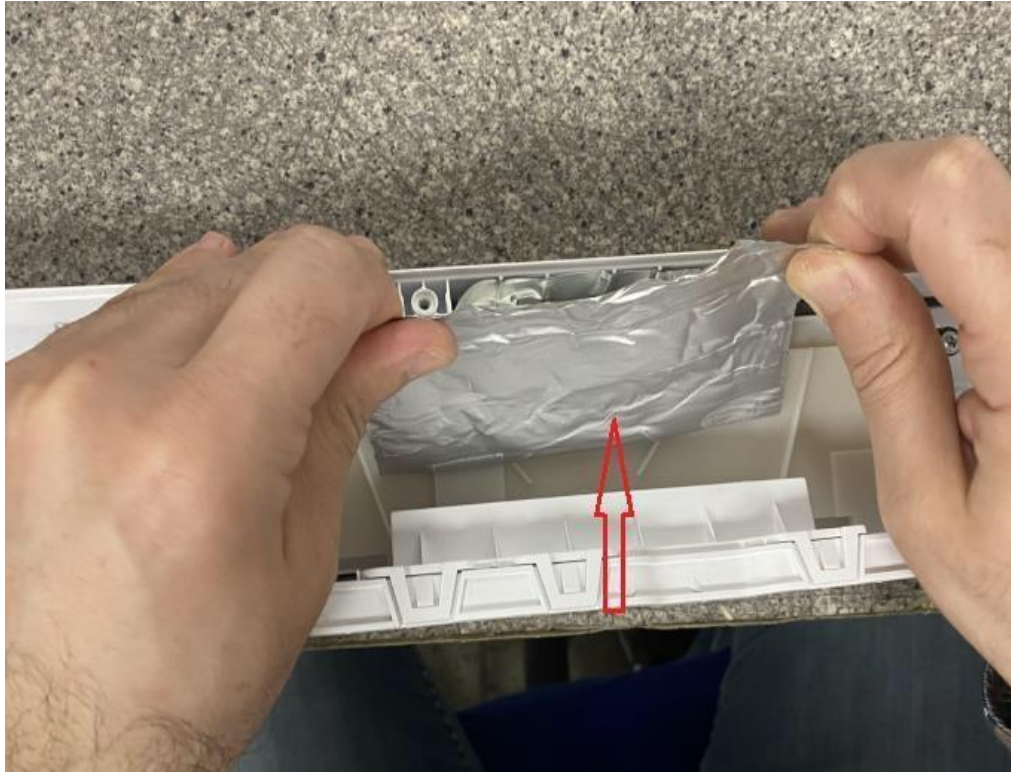

Picture 1: Shows the Al foil in the handle area

AL FOIL DISASSEMBLY STEPS

1. Slowly remove the Al foil upwards in the direction of the arrow, as shown in the picture, in the order below.
